About

Peter's research and teaching focuses on the relationship between people and place based social exclusion, how policies are designed to reduce exclusion and increase competitiveness whilst reconciling the uneven trajectory and function of places.

He has led on a number of housing market, regeneration and planning related research and consultancy projects for a diverse range of clients and funding bodies including the Department for Communities and Local Government, The Joseph Rowntree Foundation (UK), the Economic and Social Research Council, the Engineering and Physical Sciences Research Council, the European Commission and the Japan Society for the Promotion of Science. In addition Peter has worked on a number of consultative projects for regional agencies, local authorities and third sector agencies across the UK including the West Midlands and North East regional assemblies, Sheffield and Leeds City Regions and Liverpool and Birmingham City Councils. He was instrumental in delivering the current West Midlands Regional Housing Strategy and Birmingham City Council's Housing Strategy and his research informed the establishment of the £1billion Housing Market Renewal Pathfinder Programme (2003-10).

Peter is Senior Postgraduate Tutor in the School of Geography, Earth and Environmental Sciences and Director of the Urban Regeneration and Renewal MSc programme. His recent collaborative research with Waseda University focused on resilience in the context of post-Fukushima planning responses.

Qualifications

- BSc (Hons.) *Bristol University*
- MSc (distinction) Computing Science *University of York*
- Ph.D *The University of Birmingham*

Biography

Dr. Lee is Senior Lecturer in Urban and Regional Studies at the **[Centre for Urban and Regional Studies \(/schools/gees/departments/curs/index.aspx\)](/schools/gees/departments/curs/index.aspx)**, University of Birmingham. He was previously Research Associate at Heriot-Watt University, School of Planning and Housing (1992-1994) and Research Assistant at Bristol University (1989-90 and 1991-92). During this period he has focused on patterns of social exclusion related to the operation of the housing market and policies directing the strategic planning of housing investments at a variety of spatial scales. Dr. Lee's spatial analysis of neighbourhood 'risk' of low demand housing informed the location and policy design of Housing Market Renewal Pathfinders (HMRP) (2003-2010) – a £1.5 billion government programme designed to reduce low demand housing and the underlying drivers of changing demand. He has published a number of policy reports and papers that influenced debates on the identification of deprived areas and the role of housing within these debates.

Teaching

Dr. Lee leads or contributes to the following modules:

- Research Methods (Postgraduate)
- Urban Regeneration and Renewal (Postgraduate)
- Understanding Neighbourhood Poverty (Undergraduate)

Postgraduate supervision

Dr Lee supervises doctoral research students in the following areas:

- Neighbourhood Trajectories and social exclusion
- Housing markets and strategy
- Urban planning and regeneration
- Futures, foresight techniques and neighbourhoods
- Low carbon planning and regeneration strategies

Potential students interested in similar areas of research can contact Dr Lee directly.

Research

Research groups

- **[Centre for Urban and Regional Studies \(http://www.curs.bham.ac.uk/\)](http://www.curs.bham.ac.uk/)**
- **[Resilience and Urban Living \(/research/activity/resilience/index.aspx\)](/research/activity/resilience/index.aspx)**
