

## Dr Mohamed A. Abdallah PhD

Marie-Curie Research Fellow

**[School of Geography, Earth and Environmental Sciences \(/schools/gees/index.aspx\)](/schools/gees/index.aspx)**

### Contact details

**Telephone** [+44 \(0\)121 414 7297 \(tel:+44 121 414 7297\)](tel:+441214147297)

**Email** [m.abdallah@bham.ac.uk \(mailto:m.abdallah@bham.ac.uk\)](mailto:m.abdallah@bham.ac.uk)

School of Geography, Earth and Environmental Sciences  
University of Birmingham  
Edgbaston  
Birmingham  
B15 2TT  
UK

### About

Dr Mohamed Abdallah has a wide experience in applying various mass spectrometric techniques for analysis of trace levels of environmental contaminants in biotic and abiotic matrices including different human tissues. He has also made contributions to the field of human exposure to persistent organic pollutants using various exposure and pharmacokinetic models.

### Qualifications

Ph.D of Environmental Chemistry- University of Birmingham, UK. 2010  
M.Sc of Pharmaceutical Analytical Chemistry- Assiut University, Egypt. 2003  
B.Sc of Pharmaceutical Sciences- Assiut University, Egypt. 2000

### Biography

Dr Mohamed Abdallah finished his bachelor studies in pharmaceutical sciences in Egypt. He then completed a taught/research masters in analytical chemistry studying the proper methods for analysis of fluoroquinolone anti-biotics in different human tissues. During his masters studies, Dr Abdallah gained theoretical and practical experience in advanced chromatographic and spectroscopic techniques in addition to applying mathematical pharmacokinetic models to predict the in vivo levels of drug doses administered via different routes in hypertensive patients. His research during the master studies resulted in 2 peer-reviewed publications in international scientific journals.

Dr Abdallah, was awarded his Ph.D from the University of Birmingham in February 2010. During his Ph.D studies, he published 19 papers in high-impact peer-reviewed journals (including 5 as corresponding author). He also participated in several international conferences with 8 oral presentations, 4 poster presentations and 26 contributions as a co-author and won two prizes for his distinguished research.

Subsequently, He took a job as a lecturer in Assiut University, Egypt, where he continued his research in the environmental health fields, published in high-impact peer-reviewed Journals (6 publications in the past 2 years) and continued his collaboration with various international research groups via a Marie-Curie Staff Exchange Scheme, before coming back to the University of Birmingham as a Marie-Curie Research Fellow.

### Teaching

3 years of experience at Assiut University, Egypt teaching the following courses:

- Pharmaceutical Applied & Instrumental Analysis 1 and 2 (for undergraduate students)
- Analysis and Quality Control (for undergraduate students)
- Extraction and Cleanup Methods for biological samples (for PhD students)

### Postgraduate supervision

Dr Abdallah is currently supervising 2 masters students and 1 PhD student in Assiut University, Egypt and 2 PhD students in the University of Birmingham, UK.

### Research

**Scopus Author ID: 23977785900**

#### Research interests

- Human exposure to persistent organic pollutants (POPs)
- Biotransformation and bioavailability of POPs to humans
- Levels and trends of various POPs in different environmental compartments
- Understanding the link between external intake of POPs via different exposure routes and their human body burdens using various exposure and Pharmacokinetic models
