About

Leigh Crilley is a chemist specializing in the field of air pollution/atmospheric chemistry. His current research involves investigating the rate of ozone production in the boundary layer using in situ field measurements

Qualifications

Bachelor of Applied Science (Chemistry)

Doctor of Philosophy

Biography

Leigh Crilley has recently been awarded his PhD thesis on the physiochemical properties of airborne particles at the Queensland University of Technology, where he completed his undergraduate studies in chemistry. This is his first post-doctoral position.

Doctoral research

PhD title Investigations of the physical and chemical properties of ambient fine particles in urban schools

Research

Research interests

- Chemical composition and source apportionment of airborne particles
- Tropospheric ozone chemistry
- Atmospheric HONO measurements and sources
