About

Beth Boddice is a research associate (analyst) at the National Institute for Health Research Horizon Scanning Centre (NIHR HSC). The NIHR HSC provides early warning to the Department of Health of new and emerging health technologies which may require evaluation, consideration of clinical and cost impact, or modification of clinical guidance.

Qualifications

- BSc (Hons) in Health Studies, University of Wolverhampton, 2009.
- RN (dip) Registered Nurse, University of Wolverhampton, 2008.

Biography

After attaining a BSc in Health Studies Beth gained employment as a research associate (analyst) at the NIHR Horizon Scanning Centre in 2009.

Before completing her Health Studies degree Beth gained a nursing qualification and worked as a volunteer in a number of health-related projects.

Teaching

Beth facilitates small group teaching sessions for first and second year medical students on the [Medicine and Surgery MBChB \(/undergraduate/courses/med/medicine.aspx\)](#) programme.

Research

Beth currently works in the Research and Reviews team and is involved in writing in-depth technology and disease specific reviews. Recently Beth has produced reports examining new regenerative medicine treatments for the management of cardiovascular disease, musculoskeletal conditions, eye disease and skin diseases. Beth recently produced a poster presentation for the Health Technology Assessment (HTAi) conference in June 2012. In 2013 Beth significantly contributed to a publication examining emerging regenerative treatments for cardiovascular disease.
