

Industrial Advisory Committee

Formed in February 2006, our Industrial Advisory Committee makes recommendations and suggestions to help us develop and improve provision so as to keep us up-to-date with the current and future needs of industry. It operates on a two-year rolling review basis with at least two industrial members being replaced at two years.

Currently we have six industrialists (from Britvic, Corin, Delcam, Jaguar Landrover, and Renishaw), all senior professionals in their own right, who were chosen to provide as wide a range of experience as possible. It has advised on raising our profile, funding, staffing, admissions policies/ recruitment, the restructuring of taught programmes, accreditation (including UK-spec), the needs of industry in terms of graduates, and research.
