### Principal Investigator

**Jonathan Lee** (</staff/profiles/psychology/lee-jonathan.aspx>) [MA, PhD (Cantab)]

Senior Lecturer (j.l.c.lee [at] bham.ac.uk)

I spent all of my training years at the University of Cambridge, undertaking first a degree in Natural Sciences, specialising in Neuroscience. As part of this, I conducted a research project with Antony Dickinson, who provided me with an invaluable grounding in learning theory. I remained in Cambridge at the Department of Experimental Psychology to pursue a PhD, under the supervision of Barry Everitt and Kerrie Thomas, mainly focussed on the mechanisms of hippocampal contextual fear memory consolidation and reconsolidation. I remained in Barry Everitt's lab as a post-doctoral researcher, applying our understanding of memory reconsolidation first to cocaine self-administration settings, and then to natural reward-seeking settings. I was appointed first to a Departmental Lectureship at the Department of Experimental Psychology in the University of Cambridge, and subsequently to a Lectureship at the School of Psychology in the University of Birmingham.

### Post-doctoral fellows

**Charlotte Flavell**

Dr Flavell is a post-doctoral research fellow working in the Memory Persistence Laboratory. She is interested in memory reconsolidation mechanisms of both appetitive and aversive memories, and is working on the BBSRC-funded grant on "[Neural mechanisms of memory updating](/schools/psychology/labs/memory-persistence/research/neural-mechanisms.aspx)" (</schools/psychology/labs/memory-persistence/research/neural-mechanisms.aspx>)
