About

Catherine Hamilton-Giachritsis is an HCPC registered Forensic Psychologist and Clinical Psychologist with an interest in child maltreatment and family violence, including risk assessment, impact of early institutionalisation and long-term outcomes (e.g., psychopathology and/or resilience). She also studies vulnerability to online grooming and impact on young people.

Qualifications

Qualifications and professional registration

- BSc (Hons) Psychology, University of Birmingham
- PhD Psychology, University of Birmingham (1998)
- Chartered Forensic Psychologist (2000)
- PG Cert in Learning and Teaching in Higher Education (2003)
- Lateral transfer to Clinical Psychology; British Psychological Society (2006)
- HCPC registered 2009
- Associate Fellow BPS (2010)

Biography

Dr Catherine Hamilton-Giachritsis (CPsychol, AFBPsS) is an HCPC registered Forensic Psychologist and Clinical Psychologist and is currently Senior Lecturer and Assistant Director of the Centre for Forensic and Criminological Psychology at the University of Birmingham. Catherine previously worked for Birmingham Social Services Department undertaking assessments of families in child care proceedings and working in a residential unit for families where child maltreatment had occurred or was suspected. In her clinical work, Catherine has worked with both child and adult victims of all forms of maltreatment. Her research focuses on all forms of child maltreatment and family violence, particularly recurrent maltreatment, risk assessment, the impact of early institutionalisation, and long-term outcomes from and resilience to abuse and neglect. This includes sexually abusive behaviour in children and adolescents. Alongside numerous journal articles, Catherine has also co-authored information leaflets for WHO and co-edited/written three books.

Direct impact from research:

Catherine has co-founded a family assessment and intervention programme for health visitors to target support to families in need (running in Essex for over a decade), as well as been co-PI on three European Union Daphne/ World Health Organisation (WHO) Regional Office for Europe funded projects on pre-school children in institutions across Europe. As well as being presented at two high-level conferences co-organised with WHO Regional Office for Europe, it has been the focus of training for policy makers and senior managers in sixteen European countries. This work has had significant impact for young children cared for in institutions and has been discussed at the European Parliament and UN General Assembly, being part of the findings considered prior to the new UN guidance on young children in institutional care.

Teaching

Catherine is Director of the Doctorate in Forensic Psychology Practice (full time and part time). This course provides practice placements over three years alongside academic teaching from university staff and guest speakers. As well as organising and managing all aspects of the course, Catherine teaches on topics such as:

- risk assessment in child protection
- cognitive behavioural therapy
- the use of supervision and reflective practice
- HCPC code of conduct

At undergraduate level, Catherine contributes to a final year Forensic Psychology module:

- psychopathy
- early prediction and prevention of child maltreatment

Postgraduate supervision

Catherine supervises trainees on the Doctorate in Forensic Psychology Practice and the CPD Doctorate in Forensic Psychology, as well as PhD students. Details of PhD topics can be found on [www.findaphd.com \(http://www.findaphd.com\)](http://www.findaphd.com) or individuals can e-mail directly to enquire. Topics include:

- Risk assessment / early prediction and prevention of child maltreatment (including risk to siblings)

- Long term outcomes following child maltreatment and family violence
- Resilience and attachment
- Internet grooming (victim perspective)
- Institutionalisation of young children
- The role of fathers in families

Research

ORCID: 0000-0001-9796-2107

Scopus Author ID: 8651728400

ResearcherID: B-7844-2013

Catherine's main research interests and publications are recurrent child maltreatment, early prediction and prevention of child maltreatment, and the long-term consequences of maltreatment (including attachment and resilience). Catherine's international work includes jointly co-ordinating three European Union Daphne funded projects looking at young children in institutions in 33 European (including best practice for deinstitutionalisation), which was co-sponsored by the World Health Organisation Regional Office for Europe.

Other research includes adult resilience to childhood trauma; children and young people who sexually offend against others; and vulnerability to online grooming.

Research group
