About

I am interested in studying human eating behaviour using a variety of experimental techniques, including functional magnetic resonance imaging (fMRI), psychopharmacological manipulations, and novel behavioural measures of appetite and food intake.

Qualifications

B.Sc. Hons. Psychology

M.Res. Brain Imaging & Cognitive Neuroscience

Biography

I graduated with a degree in Psychology from Swansea University in 2008, after which I spent time as an Assistant Clinical Psychologist. I returned to research in 2009 to do a Masters at the University of Birmingham, and then a PhD in 2010. My PhD experimental work was undertaken both at Birmingham and at University of Oxford in collaboration with my industrial sponsor P1vital. I am presently a Research Fellow and fully trained Neuroimaging Operator at the University of Birmingham.

Teaching

I have taught Research Methods and Developmental Psychology, and presently run workshops on Good Experimental Practice.

Postgraduate supervision

I have mentored over a dozen undergraduate students, and supervised several masters students on research projects.

Research

Research interests

I am interested in the biopsychological aspects of human eating behaviour, and interventions aimed at altering food intake and food selection to improve health. I am particularly interested in psychopharmacological, cognitive, and social influences on human eating behaviour, and am presently researching a social norms approach to encourage healthier eating. My work has been funded by the BBSRC, P1vital, ESRC, and the University of Birmingham.

Other activities

Organisation

- Doctoral Researcher Development Award (DRDA) Manager, 2013
- Principal Organiser of Treatment of Obesity Conference (TOC), 2012
- Ingestive Behaviour Group Seminar Series Organiser (IBG), 2011 - Present

Awards

- Life & Environmental Sciences, Small Grant Award 2012 (£1000)
- Guarantors of Brain, Travel Award 2012 (£500)
- Experimental Psychology Society, Grindley Grant 2012 (£500)
- Hannah Steinberg Award, British Association for Psychopharmacology 2012 (£420)
- Nominated for and accepted onto the Excellence in Science Program 2012 (AAAS)
- Conference Bursary, British Feeding & Drinking Group 2010, 2011 & 2012

Professional Memberships

- British Association of Psychopharmacology (BAP)
- Association for the Study of Obesity (ASO)
- British Feeding and Drinking Group (BFDG)
- Society for the Study of Ingestive Behaviour (SSIB)
