About

Professor Copello's research has led to major impacts on addiction treatment in the UK in recent years. He was Principal Investigator in the MRC funded UK Alcohol Treatment Trial, the largest trial of alcohol treatments conducted in the UK that informs effective and cost effective delivery of psychosocial interventions for alcohol problems. He led the development of a social and family intervention (Social Behaviour and Network Therapy) used in the trial and shown to be as effective as a more established individual treatment.

His 5-Step family intervention work in primary care and specialist NHS services with colleagues in the UK has been recommended in the NICE guidelines for drug problems and also in the recent guidelines for commissioning services for carers. His work on integration of substance misuse treatment into mental health services has been quoted as a model of good practice in national guidelines and recommended for wider implementation.

Qualifications

- BSc, Psychology
- MSc, Clinical Psychology
- PhD, Psychology

Biography

Professor Copello trained as a Clinical Psychologist at the University of Surrey and later completed his PhD at the University of Birmingham. His career has combined clinical and academic work in the addictions field and he has conducted applied research as part of his joint National Health Service/University position.

Teaching

Professor Copello teaches addiction psychology aspects in various postgraduate courses.

Postgraduate supervision

Professor Copello has supervised PhDs and Clinical Doctorate degrees related to the psychology of addiction and the impacts of addiction upon families. Some of the areas researched include:

- Impact of addictions upon families
- Implementation of family focused clinical practice
- Development of web based interventions for families affected by addictions
- Addiction (alcohol and drugs) psychological treatments and outcomes
- Cannabis use and Psychosis, impacts on users and families
- The impact of excessive gaming on mental health and well being

Research

Research group

Addictions/Applied Clinical Psychology

Research supervision

Professor Copello research and clinical interests include the study of addictions, psychological impacts and interventions and the impact of addiction upon families as well as the development and evaluation of family and social network based interventions.

Other activities

Professor Copello has been formerly Clinical Director of the Birmingham NHS Addiction Services and has served on two NICE guideline development groups, one for drug psychosocial interventions and one for alcohol dependence interventions. Professor Copello has been a member of the executive council of the Society for the Study of Addiction and the chair of the New Directions in the Study of Alcohol Group in the UK.
