UK

About

Dr Renate Reniers works as a Research Fellow investigating adolescent development and youth mental health using various neuroimaging techniques.

Qualifications

BSc, MSc (Maastricht University, Maastricht, The Netherlands)
PhD (University of Manchester, Manchester, UK)

Biography

I graduated in 2005 from Maastricht University in the Netherlands with a Bachelor in Biological Psychology and a Masters in Neuropsychology. As part of my MSc, I worked at the University of Texas Health Science Centre in Houston, USA, investigating reversal learning in MDMA users using fMRI. In that same year, I started my PhD in Neuroscience and Psychiatry at the University of Manchester. In April 2010, I successfully defended my dissertation on 'Components of empathy and impulsivity: functional neuroanatomy and implications for psychopathy'. In 2009 and 2010, I worked as a Research Assistant for the Nottinghamshire Healthcare NHS Trust. As part of the Section of Forensic Mental Health, my research focused on the neural correlates of emotion regulation and moral judgement. Since 2011, I have been working as a Research Fellow at the School of Psychology of the University of Birmingham. My research focuses on adolescent development and youth mental health using various neuroimaging techniques.

Postgraduate supervision

PhD students

Sara Vilas Sanz: Social and emotional functioning in adolescents with autistic spectrum disorders and conduct disorder (co-supervised with Dr Amanda Ludlow and Professor Ian Apperly)

Research

Neuroimaging, mental health and personality disorders, impulsivity, social cognition, adolescent development, risk-taking.

With my research, I hope to increase our understanding of normal behaviour as well as the traits, behaviours and underlying neural mechanisms of individuals diagnosed with mental health or personality disorders.

Other activities

Member of the Schizophrenia International Research Society (SIRS)

Member of the International Society for Research on Impulsivity (ISRI)

Member of the International Early Psychosis Association (IEPA)

Member of the American Association for the Advancement of Science (AAAS) - Excellence in Science program
