About

Nicola is a Physiotherapy Lecturer and Programme Leader MSc Advanced Manipulative Physiotherapy.

Qualifications

- PhD University of Birmingham
- MSc Neuromusculoskeletal Physiotherapy, University College London, 1998
- PG Cert HE, Coventry University, 2001
- Graduate Diploma Physiotherapy, New Addenbrooke's Hospital Cambridge, 1998

Biography

Nicola qualified with a Graduate Diploma in Physiotherapy from New Addenbrooke's Hospital School of Physiotherapy in 1988. Nicola subsequently spent a number of years in clinical practice applying and developing her knowledge and skills in the fields of respiratory and musculoskeletal physiotherapy. Having spent time working in the UK and Canada she set up and managed a very successful Private Practice in the Lake District for 7 years.

In 1997 Nicola returned to University to complete her MSc at University College London, where she was awarded the Stanmore Prize for her research exploring the relationship between thoracic motion and breathing.

In 2000 Nicola took up a Senior lecturers post at Coventry University, where she completed her PG Cert HE as well as developed her teaching skills. Nicola moved to University of Birmingham in 2004 to continue her professional development and develop her research interests. In addition to her teaching commitments on the MSc Advanced Manipulative Physiotherapy programme, Nicola was awarded a studentship to pursue her research exploring the musculoskeletal changes in chronic obstructive airways disease (COPD), completing her PhD in 2013.

Nicola regularly lectures on the subject of musculoskeletal changes in dysfunctional breathing at national conferences and other Universities.

Teaching

Nicola's involvement in teaching, learning and supervision encompasses the subject areas of musculoskeletal physiotherapy, manipulative therapy, COPD and mental imagery. Her involvement is focused to the postgraduate programmes, particularly managing and teaching on the MSc Advanced Manipulative Physiotherapy programme and supervising MSc research students.

Postgraduate supervision

Nicola currently supervises a number of PhD, PGT and PGR students across a range of subjects relating to her expertise in musculoskeletal/manipulative physiotherapy and mental imagery

Research

Nicola has three main areas of collaborative research activity, one focused on COPD and one spinal dysfunction linked to whiplash associated disorder and lumbar spine fusion and one involving mental imagery in rehabilitation;

1. Member of the Respiratory Epidemiology Group (HAPS). This is a multidisciplinary group which collaborates on research and research related activity in COPD. I have been involved in the development of research grants, publications and now am a reviewer for a large systematic review from a funded NIHR bid. Collaborators: Professor K Jolly, Professor P Adab, Dr R Jordan
2. Musculoskeletal research (Whiplash Associated Disorder and Lumbar spinal fusion). Dr Alison Rushton
3. Mental imagery. Collaborators: Professor P van Vliet, Dr S Snodgrass

Other activities

- Allied Healthcare Professions Research Network: Birmingham University co-representative for Midlands Branch.

- Vice Chair and External Assessor Coordinator Musculoskeletal Association of Chartered Physiotherapists (MACP) Committee for Education and Approval
