### About

**PhD Title:** Evaluation of a theory-based coach education programme: Advancements in implementation, method of assessment and social inclusion

**Supervisor:** Professor Joan Duda - **Co-supervisors:** Dr Eleanor Quested, Dr Paul Appleton

Nathan Smith is a third year PhD student in the School of Sport, Exercise and Rehabilitation Science at the University of Birmingham in the United Kingdom.

### Qualifications

BSc (1st class) in Sport and Exercise Sciences, University of Birmingham, UK (2010)

### Biography

On completion of his undergraduate degree, Nathan went to work for the Professional Golfers Association at the PGA's National Training Academy. Whilst there, he contributed towards the development of online learning material for the PGA's distance learning foundation degree. After several months, he chose to return to the University of Birmingham to begin his PhD studies.

### Research

Research group: PAPA Project Research Team

Nathan's PhD is closely linked to the work of the PAPA project ([www.projectpapa.org](http://www.projectpapa.org/) (<http://www.projectpapa.org/>)) which aims to help coaches foster an empowering motivational climate and optimize their players' motivation and well-being. Specifically, his research relates to the development of an observation tool designed to assess the motivational climate created by youth sports coaches. His research will also involve the inclusion of currently underrepresented groups in youth sport.

Nathan has also been involved in research with elite dancers, high performance coaches and participants of health promotion programmes run by professional football clubs.

### Other activities

As part of the PAPA project, Nathan is being educated to deliver the Empowering Coaching curriculum to grassroots football coaches. Since starting his PhD studies, he has also been involved in the organization of a one-day conference aimed at 'promoting healthy physical activity experiences' in children.

In addition to his PhD work, Nathan is a tutor and marker for the PGA's sport science foundation degree. He is also one of the director's of Psyched4Sport ([www.psyched4sport.com](http://www.psyched4sport.com) (<http://www.psyched4sport.com/>)), a company taking a creative approach to the interpretation of sport psychology research. In his spare time Nathan enjoys playing football, golf and more recently engaging in outdoor pursuits.
