

Dr Neena Kalia

Senior Lecturer in Cardiovascular Sciences (Microcirculation Research Group)

Cardiovascular and Respiratory Sciences

Contact details

Telephone **+44 (0)121 415 8818 (tel:+44 121 415 8818)**

Email **n.kalia@bham.ac.uk (mailto:n.kalia@bham.ac.uk)**

Centre for Cardiovascular Sciences
School of Clinical and Experimental Medicine
College of Medical and Dental Sciences
University of Birmingham
Edgbaston
Birmingham, B15 2TT

Teaching

- Course Organiser for BDS 1 Biological Sciences
- Module Coordinator for BDS 1 DRE-Digestion
- Core Lectures on BDS 1 Digestive System
- Lectures on Intravital Microscopy and PSIBS Course
- Small Group Teaching on Cardiovascular, Digestion, Respiratory and Renal topics for MBChB, BDS and BMedSci
- Delivery of MBChB SSA courses

Research

Dr Kalia's research is focussed on identifying the pathophysiological mechanisms underlying ischemia-reperfusion (I/R) injury, particularly the contributory role of platelets. Furthermore, she is also determining strategies, particularly the use of adult bone marrow derived stem cells, that may be of therapeutic benefit following I/R injury. Hematopoietic and (HSC) mesenchymal stem cells (MSC) can migrate to injured tissues and help in tissue repair. However, the events that govern their recruitment to injured tissue microcirculation and mechanisms that can enhance their recruitment are unclear. Therefore, her research focuses on examining the molecular adhesive events involved in HSC/MSK recruitment to different vascular beds following injury, including the liver, gut, kidney and muscle. Inflammatory and stem cell trafficking is monitored predominantly by state-of-the-art confocal based intravital microscopy which allows real-time and dynamic microcirculatory images to be captured *in vivo*. This technique allows numerous microcirculatory disturbances to be quantitated including the various events of the adhesion cascade (rolling/adhesion/transmigration) and also changes in vascular integrity.

Other activities

- Supervision of BMedSci and PhD projects
- BDS 1 Biological Sciences Sub-Committee – Chair
- CEM Learning and Teaching Committee
- School of Dentistry Curriculum Development Committee
- Birmingham Ethical Review Sub-Committee (BERSC)
- Birmingham University Stem Cell Centre Advisory Committee (BUSCC)
- College Mentor for Postdoctoral Training and Career Development
- Technology Hub Working Group Committee
- College 'Grant Clinic' Member
- British Microcirculation Society Committee – Proceedings Editor
- *Microcirculation* – Editorial Board
- *World Journal of Gastroenterology* – Editorial Board
- *World Journal of Gastrointestinal Pathophysiology* – Editorial Board
