School of Clinical and Experimental Medicine
Centre for Translational Inflammation
Queen Elizabeth Hospital
Edgbaston
Birmingham
B15 2WB

Qualifications

- PhD - Pharmacological and molecular characterisation of P2Y receptors in endothelial and epithelial cells
- MSc Biomedical Science
- Bachelor of Pharmacy

Research

Dr Vijay D'Souza's research interest is focused on the mechanism of alveolar epithelial repair in acute lung injury (ALI) and acute respiratory distress syndrome (ARDS); and the functional importance of vitamin D deficiency in murine models of ALI.
