- 4th year: Critical Care component of the ARICM module
- 5th year: Immediate Life Support course coordinator

Research

Health Services Research

Research Activity

- As President of the European Society of Intensive Care Medicine (2004-2006) I was instrumental in establishing the European Critical Care Research Network, through the European Society of Intensive Care Medicine.
- I initiated and lead a world-wide European Community Leonardo Programme-funded international competency-based training programme for intensive care in Europe (CoBaTriCE). Completed successfully in October 2006, we are now implementing this programme worldwide, and will be developing a social sciences research programme to evaluate its impact on medical education and patient care. The programme can be viewed at www.cobatrice.org/.
- I am a member of the WHO's sepsis group within the Integrated Management of Acute Illness programme, developing best practice guidance for resource-limited environments.
- I was a member of the Executive Committee of the Surviving Sepsis Campaign (2003-9) developing best practice guidance in the management of patients with severe sepsis and septic shock.
- I am one of the lead investigators in a collaborative group studying the genetics of sepsis (GenOSept) which has been awarded a grant of Eur 2.1M by the FP6 programme (2004-8)
- I am the senior clinical lead for the DoH-funded NPSA's 'Matching Michigan' project to minimise blood stream infections linked to the use of central venous catheters.
- I am collaborating in a range of clinical projects focussed on improving the management of patients with sepsis, and acutely ill patients in general, to enhance reliable delivery of best practice care.

Other activities

- University Hospital Birmingham NHSFT Co-Director of R&D (non-cancer)
- Birmingham Clinical Research Academy Deputy Director
- Birmingham & Black Country UK-CLRN Speciality Group lead for Critical Care
- Royal College of Anaesthetists Council member and Chair, Professional Standards Committee
- Foundation Dean of the UK Faculty of Intensive Care Medicine
