About

Chris Wagstaff is a Senior lecturer at the University of Birmingham. He worked for the NHS for 14 years before entering Higher Education. He is a clinical nurse specialist in mental health and brings this experience to his role as the mental health Field of Practice lead for nursing in the college.

Chris' responsibilities as Field of Practice lead are the coordination of the teaching on the clinical modules, having an overview of mental health placements, liaising with trust partners and ensuring that the curriculum reflects current policy and best practice.

He is tutor and lecturer to a range to students at undergraduate and postgraduate levels, training both mental health nurses and other professionals. Chris plays a strategic role in the Collaborative Learning Initiative (CLI). The CLI is joint learning involving participants from different professional backgrounds, all specialising in mental health. The focus of the CLI is on interdisciplinary working and applying different theoretical perspectives. Service users and carers work as integral members of the teaching team meaning that they were involved in the designing, delivery, evaluation and dissemination of the fully interdisciplinary teaching.

Aside from teaching and Field of Practice lead responsibilities Chris has an important role in the admissions team, particularly the A2B and ROP applicants. Chris has published and spoken at conferences regarding the CLI, service user involvement in education and around his PhD – *“An Interpretative Phenomenological Analysis study into the experiences of disengagement from mental health services for people with severe mental health problems.”*

Qualifications

- Anticipated completion of PhD in Nursing Research in 201
- PG Cert Ed in 2009
- Clinical Nurse Specialist in 2004
- Msc in Health Science in 2003
- RMN/ Dip in 1995BA in Philosophy in 1990

Biography

Chris Wagstaff is a senior lecturer at the School of Health & Population Sciences at the University of Birmingham. He worked in a variety of roles for the NHS for 14 years before joining the University of Birmingham in 2004. He is a clinical nurse specialist in mental health and brings this experience to his role as the field of practice lead for mental health nursing in the college.

Chris had his school education in Holland and America before coming to Birmingham in 1987 to study Philosophy. After graduation he went to work in the Midland Nerve Hospital as a nursing assistant before doing his nurse training at Hollymoor Hospital. After qualification Chris worked in a number of positions in Solihull, Birmingham & Worcester. His last three jobs were all with Assertive outreach teams and he continues to have clinical links with the local mental health trust.

As a senior lecturer on the BNurs programme Chris has teaching, administration and research responsibilities. The details of his undergraduate teaching are listed below and his PhD research is a qualitative study into the experiences of people who have a history of disengagement from mental health services. In addition to his responsibilities as field of practice lead Chris also oversees the Field of Practice preference which all students take at the end of their 1st year. Additionally Chris is the deputy admissions tutor, with particular responsibility for ROP and A2B applicants. In an extension to that admissions role, Chris continues to work closely with those students who came via the A2B route, ensuring that these students prosper at university.

Upon completion of his PhD Chris is keen to develop both his clinical and pedagogic research profile.

Teaching

- Principles of Nursing
- Health Psychology in Nursing
- Public Health: Children & Families
- Medication Management
- Assessment, Frameworks and Interventions in Mental Health
- Promoting Mental Health, Recovery and Well-Being

Postgraduate supervision

Supervision of students on the Mres programme.

Research

Chris is currently completing his PhD - An Interpretative Phenomenological Analysis study into the experiences of disengagement from mental health services for people with severe mental health problems." After completion of his PhD he aims to continue researching disengagement, serious mental health problems and the use of IPA as a research methodology.

This clinical research will sit in parallel to pedagogic research into field of practice preference, service user/ carer involvement in higher education and interdisciplinary learning.
