About

Catalin is a Ktp Associate in Mechanical Engineering with expertise in Tribology, Fatigue and Fracture Mechanics, Finite Element Method (FEM), and Acoustic Emissions technique.

Qualifications

- Ph.D in Design Mechanics and Biomechanics, Politecnico di Bari, Italy, 2013
- MSc in Mechanics & Materials Engineering, University Paul Verlaine Metz, France, 2009
- BSc in Mechanical Engineering, University Vasile Alecsandri, Bacau, Romania, 2008

Research

Research activity

- Tribological effect of ball valve assembly for Nuclear, Marine industry
- Tribological behaviour of aluminium both experimental tests and theoretical/numerical modeling such as Scanning Electron Microscopy (SEM), Finite Element Method (FEM)
- Assessment of crack initiation/propagation phenomena in innovative materials such as titanium alloys and bi-material compounds
- Research devoted to analysis the protective coating layers applied, against corrosion damage phenomena.
- Reviewer for Journal of Mechanics Engineering and Automation, from December 2012
- Organizer of New Trends in Fatigue and Fracture (NT2F12), Brasov, Romania, 2012
- Fellowship from University of Brescia, Italy for the summer school "Computational Multiscale Fracture Mechanics", 2012
- Member on Scientific Committee of 5th International Conference on Computational Mechanics and Virtual Engineering (COMEC 2013), Brasov, Romania, 24-25 October 2013
- Member on Scientific Committee of 4rd International Conference Advanced Composite Materials Engineering (COMAT), Brasov, Romania, 18-20 October 2012
