About

Professor Shapiro in collaboration with other colleagues published the first paper on the 'attentional blink' phenomenon, which has attracted great interest on the part of many scientists. The original publication has been cited over 1000 times and approximately 500 reports on the same topic have followed from it. He employs a wide range of neuroscience approaches and tools in his research, including functional imaging (fMRI), electroencephalography (EEG) and event-related potentials (ERPs), and magnetoencephalography (MEG). Professor Shapiro is the Head of School in Psychology.

Qualifications

BSc, MSc, PhD

Biography

Professor Shapiro received his PhD in animal learning from Dalhousie University (Canada) before taking up his first (assistant professor) post at the Pennsylvania State University. He then moved to the University of Calgary (Canada) where he was tenured and promoted to Full Professor. Prior to moving to the University of Birmingham, he was employed by Bangor University where he helped to establish the functional imaging centre in the School of Psychology. Professor Shapiro has received recent funding for his research from the BBSRC, the ESRC, the Human Frontiers of Science Programme, and the Wellcome Trust.

Teaching

Animal learning, attention and memory

Postgraduate supervision

Current postgraduate students:

- Jess Kerlin

Current postdoctoral research associates:

- Risa Sawaki
- Ilja Sligte

Those wishing to apply to work in Professor Shapiro's lab are encouraged to [contact him directly by email \(mailto:k.i.shapiro@bham.ac.uk\)](mailto:k.i.shapiro@bham.ac.uk).

Research

Research interests

Attention, visual short-term memory

Other activities

Professor Shapiro recently joined the University of Birmingham from Bangor University where he held the Chair of Cognitive Neuroscience. He is a member of the Society for Neurosciences, the Psychonomics Society, and the Vision Sciences Society, as well as a member of the grant panel (A) for the Biological and Biosciences Research Council (BBSRC). He has served in the past as Associate Editor for *Perception and Psychophysics* and is currently an Associate Editor for *Frontiers in Cognition*. He is also currently a member of the Consulting Board for the *Journal of Experimental Psychology: Human Perception and Performance*.
