

Advanced Analytical Science

School of Chemistry

College of Engineering and Physical Sciences

Details

Code 10857

Level of study Third/Final year

Credit value 10

Semester 1

Module description

This module will provide participants with additional information about some techniques already discussed in preliminary courses. More importantly, it also includes several new topics, especially relating to the application of certain advanced analytical techniques. Through these lectures, it is intended to convey to students how analytical procedures are integrated into methods for particular purposes and how decisions about analytical strategy are reached.
