

Laboratory (20cr)

School of Physics and Astronomy

College of Engineering and Physical Sciences

Details

Code 18576

Level of study Third/Final year

Credit value 20

Semester Full Term

Module description

The module comprises two experiments taken from a range of different areas of physics. These areas are chosen to key-in to relevant topics from the more theoretical parts of the degree programmes and to illustrate modern and forefront topics in physics. They build on the experimental and theoretical skills acquired in earlier years. The experiments are designed to be progressive and to allow the possibility for students showing initiative to obtain higher marks.
