

[UK's first independent research to monitor fracking as it happens \(/university/colleges/eps/news/college/2015/UKs-first-independent-research-to-monitor-fracking-as-it-happens.aspx\)](/university/colleges/eps/news/college/2015/UKs-first-independent-research-to-monitor-fracking-as-it-happens.aspx)

The University of Birmingham will partner in a national environmental research programme carried out by a UK Consortium and led by the British Geological Survey (BGS). Dr Michael Rivett, Senior Lecturer in Earth Sciences (Contaminant Hydrogeology) at the University of Birmingham is a member of the consortium research team, aiming to enhance the scientific understanding and knowledge of the effects of shale gas operations on the environment.
