

Professional Services in The College of Engineering and Physical Sciences

"Effective support services are key to delivering the objectives of the College. In working collaboratively with academic colleagues we contribute to enhancing research power and providing students with a distinctive, high quality experience."

Clare McCauley, Director of Operations
College of Engineering and Physical Sciences

The College of Engineering and Physical Sciences covers a broad range of teaching and research across nine Schools. The College plays a significant role in creating new knowledge, training new generations of engineers and scientists, and interfacing with industry.

As Director of Operations, Clare McCauley is responsible for directing and developing the College's operations and administration and is part of the College's Senior Management Team and a member of the Registrar's Leadership Group. The Operations Team deliver the Professional Services to support academic colleagues in their teaching and research activities.

The team also provides support services for our students, from application to graduation, as well as to visitors and external partners. This includes providing specialist expertise across a range of activities including: technical support for teaching and research; research and knowledge transfer to identify, develop and deliver research funding opportunities; and marketing to help enhance the reputation of the Schools.
