

Operations

HR Operations is responsible for the delivery of three interdependent elements of service to the University:

- Delivery and/or co-ordination of HR processes that underpin the employment of all staff in the University from recruitment to retirement
- Provision of advice and guidance to the University on employment matters
- Supporting the University in the delivery of change and the achievement of its strategic plans.

The effective delivery of this service is achieved through the business partner model where teams of HR professionals are located within each college and corporate services to offer tailored support and guidance to colleagues.
