

Application Services

Application Services leads on the implementation and development of new and step-change software applications and manages live applications, that are used by applicants, students, staff and other visitors and partners

Application Services manages software that delivers corporate computer business systems such as Finance, Student Records, Human Resources and Business Intelligence - as well as web services such as our Content Management System, Library management systems, Portal, SharePoint and mobile apps. These are used by students and staff.

Applications work is undertaken by the following teams:

- Commercial Development Pool
- Bespoke Development Pool
- Commercial Sustainance Team
- Bespoke Sustainance Team
- Process and Integration Analysts
