

IT Services

"IT Services is mission critical to teaching, research and to supporting the University as a business. We enable students to stay connected and staff to discover new ways of working, while powering research that advances the University."

Dr Sean Duffy, Director of IT Services

IT Services is responsible for sustainable provision of core IT infrastructure and application services across the University that support academic research and learning and teaching. Central and College-based teams in IT Services together with other colleagues deliver new applications and services, or enhancements to existing capabilities. Together, IT Services teams strive to provide up-to-date, effective and customer-oriented services to students, staff,

researchers, visitors and partners.
