

March 08 Newsletter

Results

Thank you to those that met the external examiner a few weeks ago. Nigel's term of office comes to a close in the summer and there will be a new examiner – probably Prof Paul Luckham from Imperial College.

You should receive your updated results in the post or directly from Dr.Greenwood in the coming week. If there is a module missing or any mistake please get in touch A.S.A.P.

Conference

The abstract for the conference is due in at the end of March so please ensure that you give it to your industrial supervisors in the next fortnight for approval. Similarly you might want to discuss your poster/talk content well in advance. Abstracts not received on time will be included in the conference proceedings as such! If you haven't told Dave that you are a vegetarian you will be getting a meat dish at the conference meal.

Eggheads

You might want to watch BBC2 on Friday 14th March as a team from Imerys containing Rachel Thomas and Richard Tamblyn will be appearing, I won't spoil the result for you, CJ de Mooi also stars. <http://www.demooi.co.uk/index.htm>

Vivas

Congratulations to David Bird on passing his Viva with minor modifications. David is our second graduate. Hopefully in the next few months Ajay, Matthew and John Henry will be examined.

Renewal of Funding

We have been asked by the EPSRC to submit a new bid for the next batch of funding. This means that we will need to report every conference paper and journal produced by the research engineers so please let Dr.Greenwood know of any publications either in press or pending.
