

Transcript – Civil Engineering Video - PHD Students

PHD Student 1: Studying at Birmingham University is a really good experience. The lecturers are very friendly, supervisors are very helpful and the campus is just fantastic. It's a really enjoyable experience for me and I would advise students to follow my steps.

PHD Student 2: I thought that the department of civil engineering had a lot to offer. I have known people who have graduated from the University of Birmingham, from the department and I thought it was the best, I didn't have to look around.

PHD Student 1: The facilities are great, the facilities from the library, the e-learning, the e-journals, WebCT, supervisors, lecturers, conferences that are offered – it is a really really good environment for learning and it's really helpful.

PHD Student 2: I think all the lectures and guidance supervisors from this department of civil engineering have a lot to support. It's not that you feel individualized by one guide, you can find guidance from all of them.

PHD Student 1: I have chosen my course myself because I wanted to do a PHD in risk analysis, and Birmingham University offered me the funds to do the research that I would like to do, and therefore the work for my PHD was very enjoyable.

PHD Student 2: Whether it is how to write a thesis, or getting into the technical areas of research or the science behind in, or how a thesis would be written and how it could be a practical application, during all the phases there was a large support from the university.

PHD Student 1: If you would like to have an enjoyable course, working with friendly students and very friendly and approachable lecturers, please do come to Birmingham University, and you won't regret your choice.
