## IPG Strips

**SERVA IPG BlueStrips** are dried gel strips with immobilised pH gradient used in high resolution 2D gel electrophoresis of proteins. The strips have to be rehydrated before use. The homogeneous polyacrylamide gel matrix is covalently bound to **GEL-FIX™** to stabilise the gel. Additionally, a non-binding cover film (**GEL-FIX™** for Covers) protects the gel from damage and contamination. Each gel strip has its own lot number printed on and, therefore, is suitable for documentation according to GMP/GLP.

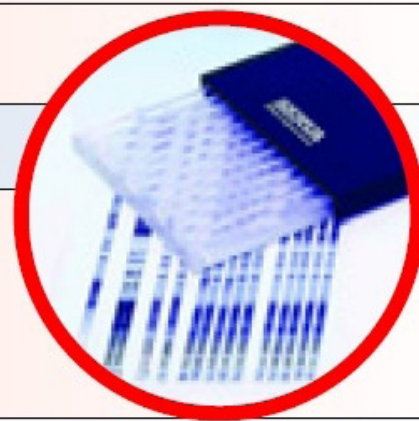

Stored at -20 °C the gel strips are stable for at least 18 months. Each package contains 12 gel strips (all gel strips are 3 mm wide). Other pH gradients and gel strip lengths are available upon request.

- Consistent performance - 12 strips per package, all derived from the same production lot
- Reliability - accurate casting procedures ensures lot-to-lot reproducibility of pH gradient
- GMP/GLP conformity - each strip has its individual lot number

Description (Gel Dimensions -110 x 250mm)	Cat No.	Price
SERVA IPG BlueStrip pH 3 to 10, 7cm, PK/12	43001.01	£61.00
SERVA IPG BlueStrip pH 3 to 10, 18cm, PK/12	43011.01	£77.00
SERVA IPG BlueStrip pH 3 to 10, 24cm, PK/12	43021.01	£89.00
SERVA IPG BlueStrip pH 3 to 10 NL, 7cm, PK/12	43002.01	£61.00
SERVA IPG BlueStrip pH 3 to 10 NL, 18cm, PK/12	43012.01	£77.00
SERVA IPG BlueStrip pH 3 to 10 NL, 24cm, PK/12	43022.01	£89.00
SERVA IPG BlueStrip pH 4 to 7, 7cm, PK/12	43003.01	£61.00
SERVA IPG BlueStrip pH 4 to 7, 18cm, PK/12	43013.01	£77.00
SERVA IPG BlueStrip pH 4 to 7, 24cm, PK/12	43023.01	£89.00
SERVA IPG BlueStrip pH 6 to 10, 7cm, PK/12	43004.01	£61.00
SERVA IPG BlueStrip pH 6 to 10, 18cm, PK/12	43014.01	£77.00
SERVA IPG BlueStrip pH 6 to 10, 24cm, PK/12	43024.01	£89.00

## Rehydration Tray for IPG Strips

To rehydrate up to 12 IPG strips in lengths up to 24cm. The rehydration tray maintains its shape and is resistant to chemicals normally used to rehydrate IPG strips.

Description	Cat No.	Price
Rehydration tray, each	43091.01	£159.00
