Background	3
Key Emerging Themes	4
Asset and Networking Mapping Analysis	9
Agents of Change	10
Ideas Championed	11
Tweeting Outcomes	15
Evaluations	16
Appendix A – List of Participants	
Appendix B – Events Write Up	
Appendix C – Network Mapping Report	
Appendix D – Twitter Report	

## Acknowledgements

We would like to acknowledge the grant from Barrow Cadbury Trust that enabled us to add a social media dimension to this impact project and to the Department of Communities and Local Government for agreeing to host the launch event in particular to Hulya Mustafa who gave the key note speech and participated in the Guardian online debate. Also Harriet Ackunson of DCLG and Debbie Pippard of BCT who were our key contacts in organising the event.

We would also like to thank the experts for sharing their knowledge of social media with us, David Wilcox, Drew Mackie and Dave Briggs who set up our Civicrowd platform. Thank you also to the expertise, encouragement and problem solving approach of Roxanne Persaud (Community) and our video expert Adrian Nettleship. The event was supported by volunteer facilitators, Rosie Anderson, previously of Community Matters and Clare Payne of BCT.

The online video's and content would not have been possible without the energy and enthusiasm of our participants who gave a day out of their busy and hectic lives to listen, learn and contribute to this project.

The Below the Radar (BTR) research stream of the Third Sector Research Centre (TSRC) was established to explore the role, function, impact and experiences of small community action groups or organisations. These include those working at a local level, or in communities of interest which are formal organisations, or more informal community activity. The BTR research is informed by a TSRC Reference Group which brings together practitioners from national community networks, policy makers, researchers, as well as others who bring particular perspectives from the sector.

Since the BTR Reference Group met last September 2010 we have been developing an action planning/impact project to explore how to overcome some of the challenges, identified by our research, for communities, practitioners and policy makers. The Beyond the Radar 2011 (btr11) project was launched in July 2011 with an event hosted by the Department for Communities and Local Government (CLG) and over 50 participants attended from the policy, practice and research communities (see Appendix A). Barrow Cadbury Trust (BCT) provided funding to enable us to offer an online 'virtual continuation of the debate' for participants, and for the wider public engagement, using social media over a six month period.

The aim of the btr11 impact project is to explore the implications of the BTR research findings, and to see how changes can be made to maximise impact. The impact facilitation model used for the event was adapted from an international approach (RAPID) which maximises the influence of research-based evidence on policy and practice,<sup>1</sup> and from 'Our Society's' adaptation of social network mapping theory<sup>2</sup>.

The event was chaired by Sara Llewellyn, CEO of BCT. She introduced the work of the Trust and reinforced the Trust's support for the BTR research team. As keynote speaker, Hulya Mustafa, Deputy Director of the Big Strategy Team, Department of Communities and Local Government (CLG) outlined the key strategic priorities of the Government in relation to communities. TSRC researchers, Angus McCabe and Andri Soteri-Proctor set the scene based on their BTR activities to date. The remainder of the day offered a series of participatory workshops for participants to:

- map the socio-economic and political context for BTR activities;
- undertake a 'force field analysis';
- participate in a network and asset mapping exercise;
- identify key stakeholders and create an interest and influence matrix;
- explore ideas and solutions to share after the event through online discussions and a virtual social media platform.

The event outcomes were recorded on the day (see Appendix B and C), tweets (see Appendix D) and vox pops were available for participants to record their views. These can now be viewed on <http://btr11.civiccrowd.com>.

An online rapporteur (micro blogger), tweeted about the event to engage a live virtual audience. A 'civiccrowd' platform was created to offer an ongoing interactive space in order to continue the conversation with wider networks after the event. The Guardian Voluntary Sector Network hosted the first of our live Q&As in July, with a panel from the world of academia, policy and practice. We are

<sup>1</sup> Overseas Development Institute's RAPID (Research and Policy in Development) Model - Young, J. 'Impact of research on policy and practice', ODI, Gateway for capacity development, [www.capacity.org](http://www.capacity.org)

<sup>2</sup> See website [www.oursociety.org.uk](http://www.oursociety.org.uk)

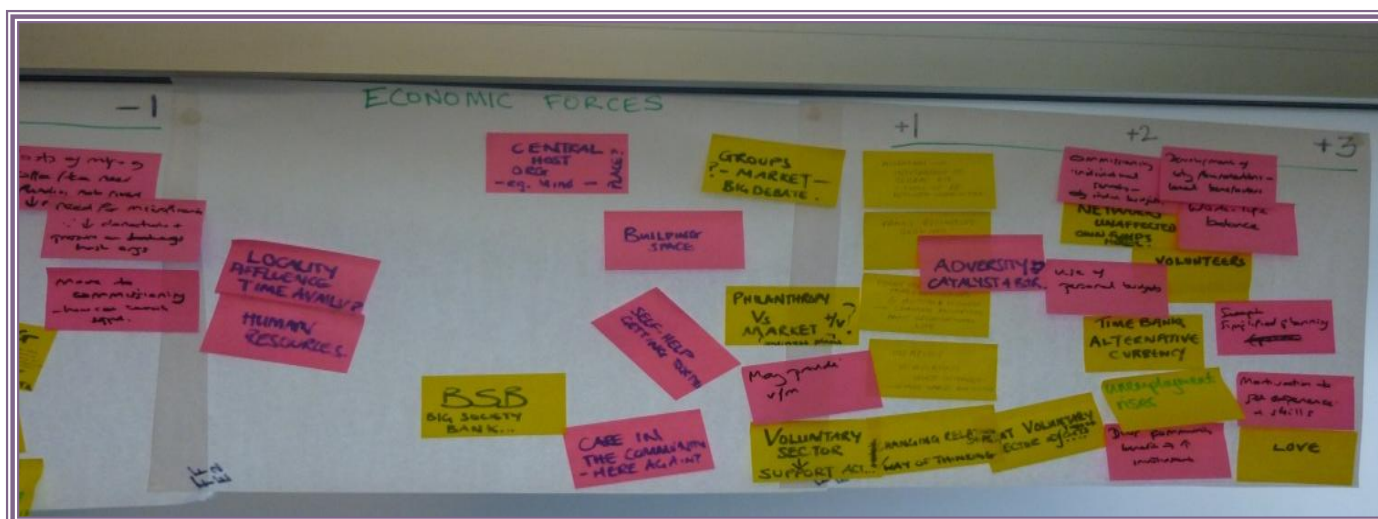

planning a series of other online debates targeting different communities to introduce new participants to the 'civicrowd' site over the next six months.

This conference report is the first of three reports which will make up the btr11 Impact Project Report and details the outcomes from the event itself. The second report which will be published in early 2012, will be an academic discussion paper on the use of social media as a tool to engage wider audiences in knowledge exchange. The final report will be an evaluation of the project's process, reflecting back over the six months since the launch event to consider the project's impact.

## Key emerging themes from the socio-economic and political contexts and forces

Two exercises were undertaken with participants to explore the social, economic and political contexts and forces at play for BTR groups in the current climate. Given the realities of local power and influence, they were asked to: assess the positive and negative forces on BTR which had an influence on the sector; and what needed to change. They placed the forces on a scale of -3 to +3 depending on the strength of the forces for each context. Below are highlights from the contributions made based on four emerging themes we have identified (some texts have been amended for clarification, the original texts can be found in Appendix B) :

## (1) Power and equality: who is being empowered, who is more able to engage?

	CONTEXTS	FORCES
<b>Social</b>	<p>Power between communities</p> <p>Conforming to expectations of 'good' structure/organisation</p> <p>Policy blindness to social inequalities, stress on community representatives</p>	<p><b>-3</b> In the current economic climate and welfare changes, people in communities do not have the energy or capacity to commit time or more time. (x2)</p> <p><b>-1</b> People hijacking issues and not working for the general wider community. Stigma about particular problems such as mental health. Usual suspects trying to steer and dominate agendas. Logic of market forces against socially equitable outcomes.</p> <p><b>+3</b> Local Authorities and communities joining forces for mutual benefits based on local needs!</p>
<b>Political</b>	<p>Different agendas of councils</p> <p>The structures that challenge marginalisation are being lost</p> <p>Grey areas around meaning of localism, which communities have power?</p>	<p><b>-3</b> Postcode (<i>lottery</i>) nature of Big Society</p> <p><b>-2</b> Commissioning systems, localism not just about local voice, but ability to deliver local solutions and commissioning systems favour 'same old'</p> <p><b>-1</b> (<i>ethnic</i>) minority voices. Unequal benefit of devolution to communities.</p>
<b>Economic</b>	<p>Crowding out by wealthy</p> <p>Resources for Black and Minority Ethnic (BME), marginalised communities (<i>are needed</i>)</p>	<p><b>-2</b> Attracting investment, innovative means in charity deserts. Locality, affluence, time and availability.</p>

## (2) Individual citizens: motivations and time available; shifting relationships because of new context and forces

	CONTEXTS	FORCES
<b>Social</b>	<p>Culture change in services/government /formal sector</p> <p>Transient and highly mobile populations</p>	<p><b>-3</b> Social implications of public sector funding and benefit reductions. Understanding jargon. (x2) Fragmentation of communities. (x2) Lack of public spaces. (x2)</p> <p><b>-2</b> People in crisis don't have time to engage. Communities understand place in a different way. Lack of community facilities, increased living and housing costs breaking up families, lack of support.</p> <p><b>-1</b> Drastic change in relationships between state and citizen. No resources and market forces. Government 'nudge' unit and focus on individual behaviour has some merit but steers the conversation away from systems, processes and social support, and/or responsibilities.</p>

		<p>Issues regarding people understanding how to access services, which services are appropriate/ relevant etc.</p> <p><b>0</b> Changing relationship between government, local authority, individuals. Choice may not always be desired.</p> <p><b>+1</b> Changing demographics, older people increasing, ethnic diversity. Neighbours showing interest (<i>and more</i>) care to each other.</p> <p><b>+2</b> There are many people who are willing and able to support others and provide some leadership.</p> <p><b>+3</b> Personalisation, budgets can be empowering for some! Strong individuals. Real power and influence for local people.</p>
<b>Political</b>	<p>Nature of empowerment, individualism versus community</p> <p>Government accountability</p>	<p><b>-3</b> Entrenched culture of direct power at local level. Entrenched embedded political power. Lack of influence for individuals.</p> <p><b>-2</b> Government pushing down power in 'nice' (easy) categories, not cutting across issues. Working in silos.</p> <p><b>0</b> <i>Policies of</i> reward, responsibility and accountability</p> <p><b>+1</b> Growth of citizen education, more aware young people</p> <p><b>+3</b> Individuals can still have influence and make a change if they can still put in the time and effort.</p>
<b>Economic</b>	<p>Accountability of public funds by government</p> <p>Cuts to shared resources for local communities</p>	<p><b>-3</b> High level cuts feed down to individual spending. Less benefits (social security). Danger of over reliance on volunteers.</p> <p><b>-2</b> Lack of time, growth of informal economy. Working poor, have time poverty.</p> <p><b>0</b> Care in the Community –here again. Locality and affluence <i>effects on</i> time and availability</p> <p><b>+2</b> Commissioning individual services, individual budgets. Use of personal budgets.</p> <p><b>+3</b> Motivation to get experience and skills.</p>

### (3) BTR groups: indirect and unintended consequences of voluntary sector reconfiguration

	CONTEXTS	FORCES
<b>Social</b>	<p>Maintaining independence and /or activism</p> <p>Understanding activity beyond 'community anchors'</p>	<p><b>-3</b> Remoteness of top tier authorities from communities.</p> <p><b>-2</b> Difficulty of developing a local coalition as strengths are often meeting specific needs not generalised. Support mechanism for mediation being cut: so difficult to deal with challenging, complex social challenges in some places.</p> <p><b>0</b> Where is conflict in this conversation? Creation of interest groups.</p> <p><b>+1</b> New roles, new skills, new ways of working and culture.</p> <p><b>+2</b> The drive of local authorities to engage with small groups e.g. Service delivery.</p> <p><b>+3</b> The right of groups not to engage with new ideas/agendas.</p>
<b>Political</b>	<p>Asset transfer – is it realistic?</p> <p>Funding cuts/cuts to contracts with VCS</p> <p>Lack of understanding of community development, cultural difficulties</p> <p>Lack of understanding of issues and communities</p>	<p><b>-3</b> Pushes BTR groups to be more resilient, defy empowerment (agenda). Lack of recognition of the need to recognise the role of small groups or networks, no 'one size fits all'. Empowerment – lack of grant funding to support very small community groups, lack of support for groups, political polarisation, equality, less emphasis on user voice.</p> <p><b>-2</b> Politics using a particular type of language not acknowledging the roles of community groups and networks. Timing, readiness of organisations to respond to new rights. Preparing bids, to buy assets, local organisations bidding to provide local services. Fear and impact of cuts is restricting the quality and range of work.</p> <p><b>-1</b> Challenge of engaging with longer, consolidated, contracts for small voluntary sector organisations with little or no working capital. Transnational money flow, undermines community activity.</p> <p><b>0</b> Unwillingness to fund process or community level outcomes. Conflict between local elected reps and community empowerment</p> <p><b>+3</b> Asset transfer, and asset management, need for support, if can be sustained.</p>
<b>Economic</b>	<p>Cuts of shared resources for local communities</p> <p>Bonfire of infrastructure organisations</p> <p>Consolidation for</p>	<p><b>-3</b> Loans? Obstacles? Accountability? Uncertain funding landscape. Loss of small grants. Pressure to formalise for government funding.</p> <p><b>-2</b> Previously free services now charged e.g. meeting rooms.</p> <p><b>-1</b> Costs of meeting. Move to commissioning.</p>

	contracts VCS can't engage as (contracts) too big	<p>Need for micro finance</p> <p><b>0</b></p> <p>Central host organisation e.g. Mind</p> <p>Self help, getting together.</p> <p>Big Society Bank.</p> <p><b>+1</b></p> <p>Focus on: enabling coops and mutual businesses; changed assumptions about organisational life. Changing relationships and ways of thinking about voluntary sector (time of cuts).</p> <p><b>+2</b> Networks unaffected, if have own funds.</p> <p>Time banks alternative currency.</p> <p><b>+3</b> Development of city foundations, local benefactors</p>
--	---	--

#### (4) Government: contradictory agendas and messages

	CONTEXTS	FORCES
<b>Social</b>	<p>Culture change in services/govt/formal sector</p> <p>Policy blindness to social inequalities, stress on community representatives</p>	<p><b>-3</b></p> <p>Politicians consistently 'behind the curve' of our social issues. Failure to see the significant difference in nature between community activity and the organised world ( institutions, voluntary sector, business).</p> <p><b>-2</b></p> <p>Contradiction between government priorities of economic growth (wealth) and 'Big Society' (wellbeing).</p> <p>Cutting funding to parks, children centres, local community groups undermines communities and social wellbeing.</p> <p>Localism may provide innovative solutions or may not. And may not be of sufficient scale/reach.</p> <p>How will government know if it is unsuccessful, who will pick up the pieces ? Contradictions between collective actions and individualised empowerment/ personalised budgets etc.</p> <p><b>-1</b></p> <p>Contradiction between communities and active citizens</p> <p><b>0</b></p> <p>Payment by outcomes may not reflect community needs.</p>

<b>Political</b>	<p>Different agendas of councils, structures that challenge marginalisation are being lost</p> <p>Funding cuts/cuts to contracts with VCS</p> <p>Grey areas around meaning of Localism, which communities have power ?</p>	<p><b>-2</b> Government accountability for monitoring of big programmes which totally interferes with giving powers to communities to make their own decisions.</p> <p><b>-1</b> Structure inhibits voluntary sector bidding for contracts. Policy makers seemingly not listening to sector request to make Big Society Bank about 'soft, patient, impactful' capital (New Philanthropic Capital).</p> <p><b>0</b> Localism agenda, and Localism Bill. Democratic deficit. Lack of credibility.</p>
<b>Economic</b>	<p>Consolidation for contracts VCS can't engage as (contracts are) too big</p> <p>Accountability of public funds by government</p>	<p><b>0</b> Groups or Markets - BIG DEBATE. Building space. Philanthropy versus market (business plans).</p>

## Asset and networking mapping analysis

Participants were then asked to consider, given the current social, economic and political contexts that effect BTR community groups and activities, what assets, networks and connections they had that could make a difference. Full report available at Appendix C. Based on the completed questionnaires 'network maps' were generated (see example below).

Based on 28 completed questionnaires, most of the participants were networkers (rather than network thinkers, analysts or builders)<sup>3</sup> interested in using the event to extend the range of their contacts. Over half had small, localised or interest-based networks. Assets included:

**Resources:** premises, funding, volunteers, knowledge / experience, speakers;

**Skills:** management, technical, facilitation / event management, communication, research, ideas/insight, sharing/collaborating, training/capacity building, network building;

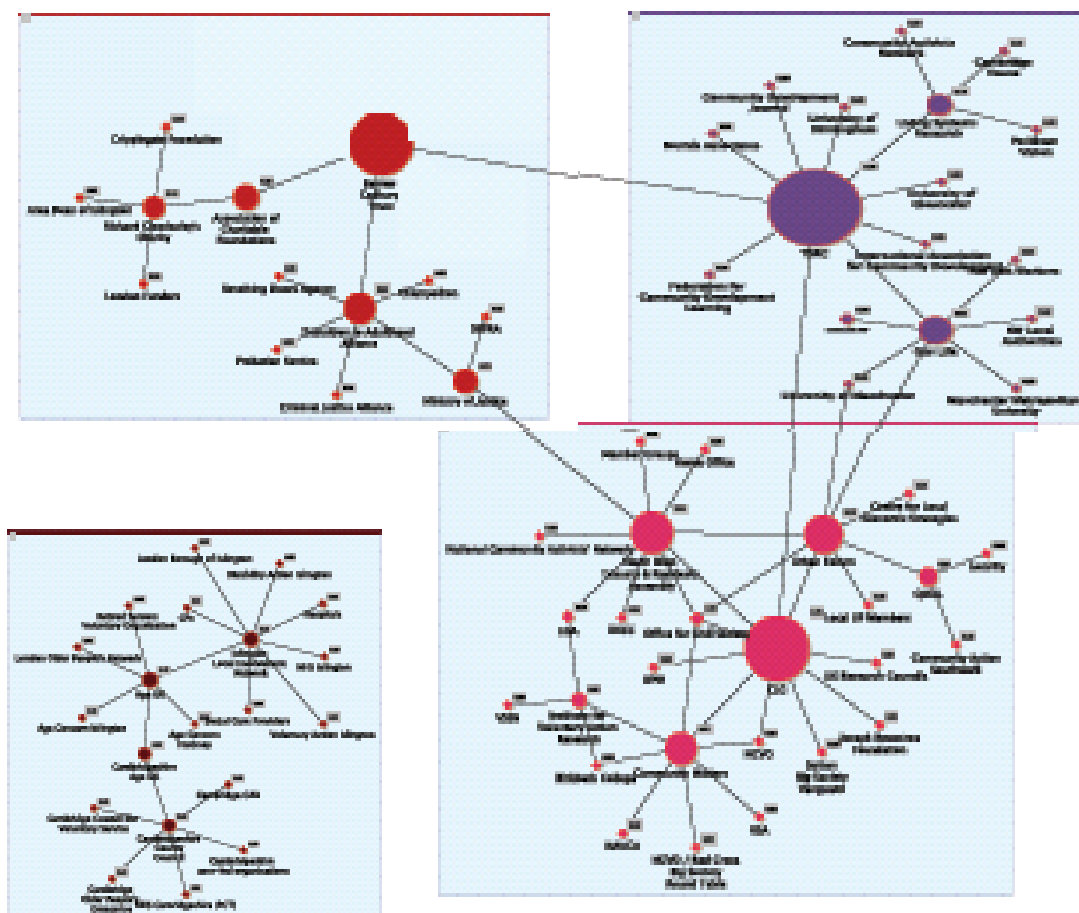

**Influence:** power, position, contacts/networks, credibility, representation, access.

The maps generated raise a number of questions:

- How do the 15 unconnected clusters become more connected to the larger clusters around the main organisers (TSRC, BCT and CLG)?
- The three larger clusters are a mixture of research and action bodies. How do they work together and is the primary role for the btr11 project to be research or common action?
- What are the next steps in drawing the network together, and can this help the on-the-ground work of members?
- Can the btr11 project become a virtual network builder creating tools to encourage interaction between attendees and interest groups or individuals offering a clearing house for social networking?

<sup>3</sup> See Appendix C for a full explanation.

It is hoped that the project can create a 'virtual environment' where people can network, and where people can share ideas for action to support local networks.

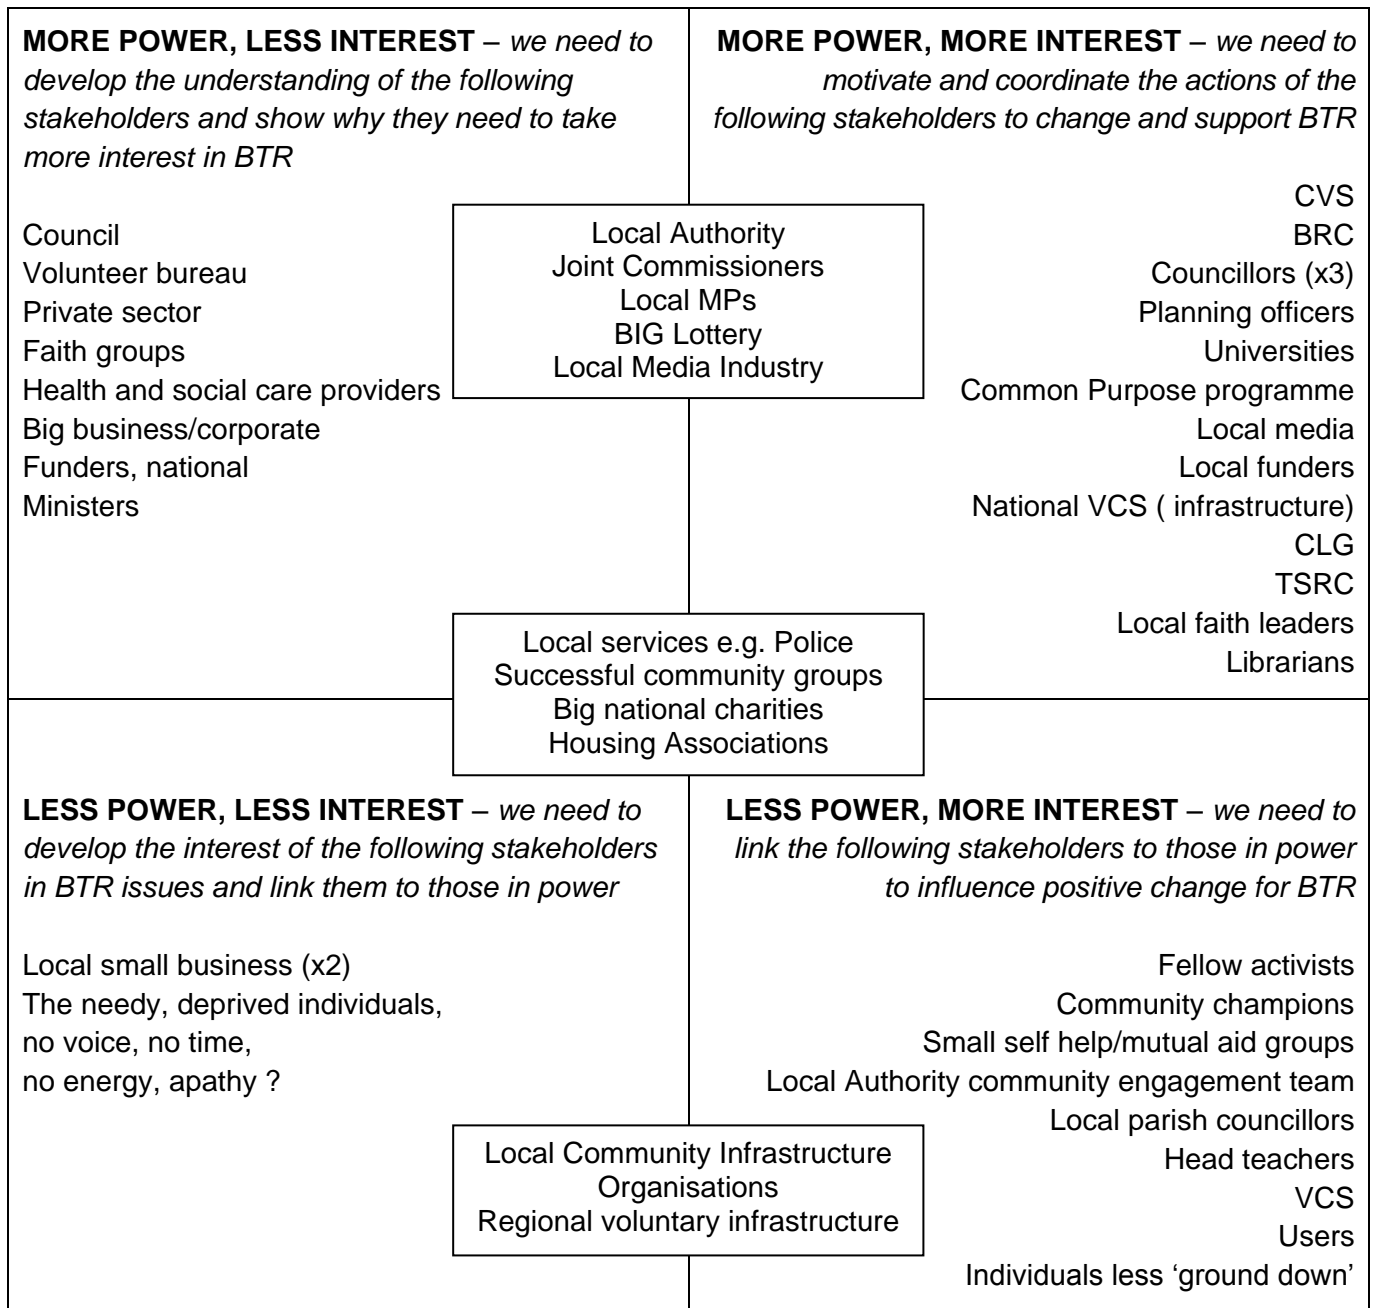

## Agents of change

After lunch participants considered how they could use their assets and networks to create change.

- Who are the stakeholders that they need to influence on the micro (local) and macro (regional/national) level?
- How interested were these stakeholders in BTR issues?
- How could they be influenced?

Below is the matrix generated, the boxes in the middle axis indicate that participants were undecided in placing these stakeholders in a particular quadrant and so they were placed as having neither more nor less interest in BTR issues. The italics are suggest as possible actions that can be taken given the quadrant the stakeholders have been placed into.

## Ideas championed

This session was used to analyse what we have in our power to create change, what forces are at play, and how we can maximise what we have to influence change in our localities and on key stakeholders. We recorded the key messages to take forward from the day using an open space approach with flags for action to bring groups together.

### FLAGS

#### Flag for action 1: focus on local activists and leaders:

Set the group up, continue the debate and exchange email addresses.

## Flag for action 2 : creative approaches to resourcing small groups and successful stories:

### Examples of help already available:

Seed money: small grants from a number of funders catalyse mutual aid.

Websites offering resources, for example free meeting space for groups.

### Ideas for other things that could help:

- schools, churches, pubs making space available free of charge;
- personal relationships between funder and small groups enhances trust and increases the likelihood of funding;
- funders should make proportionate demands – light touch for small grants;
- funders could consider giving a sum to (trusted) intermediaries for disbursement to BTR groups. Small groups could benefit from pro-bono work;
- independent charitable trusts can be more flexible than statutory ones;
- helping intermediaries understand the aims of small groups;
- local shops can be a source of funding for local BTR groups;
- Corporate Social Responsibility (CSR) opportunities – BTR could promote opportunities to local businesses.

## Flag for action 3: map local assets/networks and research and support under the radar groups:

- skills of activists, buildings, spaces;
- relationships – connecting up community activists/groups with neighbourhoods but also with other communities and public sector;
- building trust between small businesses and community groups based on community interests.
- look at/value what we have(*our assets*);
- joint local community group and small business champion;
- Local Authorities commissioning and/procurement.

## CARDS

In addition to the flags, idea cards were generated using 'Our Society' starter cards to generate ideas:

### ***Mentoring visits***

*Problem:* community groups can gain ideas and support from others, but may need to go outside their neighbourhood.

*Solution:* organise visits to link groups, and then support peer-to-peer mentoring

*Needs:* national framework, local organising  
(idea used most from *Our Society* starter ideas).

### **Community organisers**

*Problem:* small community groups need somewhere to be based and cannot continue to pay current rent and overheads.

*Solution:* use existing unoccupied retail units for social enterprise businesses.

*Needs:* promotion of available units on high street.

*Problem:* neighbourhoods with poor connectivity between social/public/commercial sectors.

*Solution:* community resilience action plan based on identification of shared needs/assets.

*Needs:* someone to investigate bringing people together at the local level.

*Problem:* BTR groups tend to focus inwardly and locally and may not provide potential for individuals (and the group) to develop.

*Solution:* develop networks (some regional ones are already going).

*Needs:* small amount of resources and leadership.

### **Community delivery teams (volunteers)**

*Problem:* lay knowledge and networkers, build esteem, and capacity builds community.

*Solution:* team of supported local volunteers, trained.

*Needs:* training support, money to remove barriers for crèche and transport.

### **Area based community development (CD) workers**

*Problem:* need coordinated communities.

*Solution:* a CD worker, advocate.

*Needs:* funding.

### **Advocacy and campaigning project**

*Problem:* the participation rates of BME in our democracy is a serious problem which we need to take a lead on.

*Solution:* participation will increase confidence and motivation to alight and face the reality of the democracy they live in.

*Needs:* resources, support and organisation.

### **Open and inclusive community engagement**

*Problem:* ask the people what is open? Inclusive?

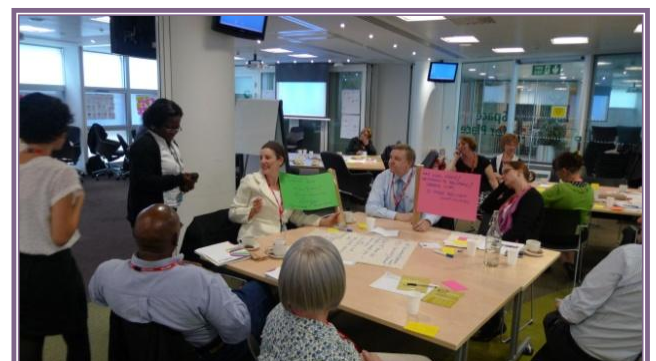

*Solution:* it is an ongoing process.

*Needs:* funding, will power.

*Problem:* aspiration building.

*Solution:* you need to know what the possibilities are.

*Needs:* online hubs, exhibitions, visits.

*Problem:* funding for small groups.

*Solution:* speed dating with high finance groups.

*Needs:* engagement with groups and local companies,

### **Community feasts**

*Problem:* bring community together to know each other.

*Solution:* food stalls from service providers.

*Needs:* art, fun, food (provided by community members).

### **Co-design and co-delivery with local communities**

*Problem:* deliver services that people want and need in a way that they want and need them.

*Solution:* help communities to do this, help services to know how to partner equally.

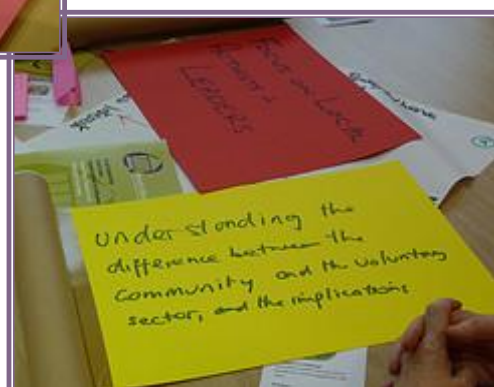

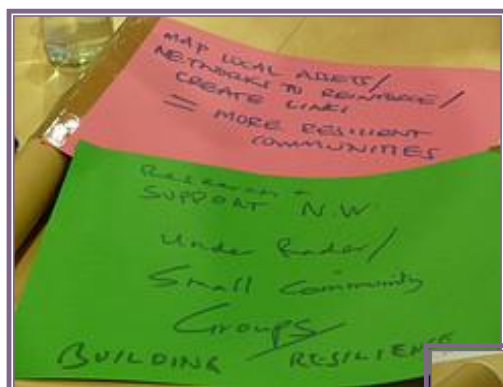

*Needs:* aspiration good practice community delivery teams, training, support, CD, spaces, community coordination.

### **Policy debating society**

*Problem:* to set a debating society whereby we pick an issue.

*Solution:* the ability to make them understand what government policy is all about.

*Needs:* resources.

In addition to the 50 event participants, the tweeting (micro reporting) generated engagement from another 20 people, through an exchange of 130 tweets, 30% being re-tweets (see Appendix D for full report). As a result 38 twitter accounts have been added to our list of participants who will be kept informed of future online discussions. The tweets are estimated to have reached around 45,000 followers which included big and influential followers (big names or with large followings) some of whom were shared between tweeters (therefore reinforcing the messages sent). The tweeting generated conversation threads ('storifies') on the big society and micro-mapping, as well as network and power analysis. More than 25 links were shared including the TSRC events page and TSRC Working Paper 51, and TSRC BTR research pages. The profile of those engaging online ranged from social entrepreneurs, to voluntary organisations and individuals outside the UK.

*Some of the tweet highlights included:*

"How do we focus on the power in networks? Changing the dynamics of the networks needs attention and influence... how can we ensure people with the resources and skills are also central to our network? Only then will we be effective! ... Often missing the real data to support localism – no one knows what's out there so how do we work to include them?" Mark Parker

"Micro groups are delivering services to local public over a long period – but this is not the same as 'delivering public service'....Big question today: Do we want to reveal the 'invisible architecture'? If the agenda is transfer of power what needs to happen? ... Participants comment: empowerment is not activism – community sector position to seize power while charities seek contracts." Commutiny

"Love the fact that the overarching aim of the BCT is to 'speak truth to power'. We need more of that ... Huyla Mustafa of DCLG says Government's three priorities are economic growth, creating a big society, and delivering public service reform.... government thinks those three things run in parallel and don't contradict each other, I disagree. I think they clash (at least in part)... big questions being raised about power, influence, advocacy and representation. Exciting to be among people doing and championing that stuff." Steve Coles

## Evaluations

In addition to the word cloud at the beginning of the report, participants were sent a more detailed evaluation form. From those completed, all rated the conference overall as good, very good or excellent. They rated the format of the conference as follows:

- administration - excellent and very good;
- overall format – very good and good;
- group sessions – excellent to adequate;
- discussion time – excellent to adequate.

All the workshop sessions were rated overall as very good and good.

Participants found the following particularly valuable:

- the topic was an interesting subject which highlights a subject matter of which there is little interest - the issue now is, what is the way forward and what actually will this lead to?
- interacting (networking opportunity) was invaluable;
- aspects of the work of other organisations ... I now have a much fuller understanding;
- I enjoyed meeting other people with an interest in 'below the radar' groups in healthcare, and learnt from their experiences and knowledge;
- the workshop is brilliant and a good start to often a neglected area.

Participants stated they would use the information from the day to inform their work in the following ways:

- the information will be vital for the small organisation as a source to consider for a vital bid to the council for any feasible asset transfer tender;
- a basis for further discussion and exploration;
- information gained is critical in helping NWTRA (North West Tenants and Residents Association) to advise and support our (BTR group) members much better;
- understanding how we can help them to become much more effective locally;
- try to develop these contacts, and put the work I do into the broader context of 'below the radar' activities;
- will try to keep in touch.

Participants suggested the following improvements:

- I only hope that this will constitute the basis for a more thorough attempt to have a better understanding of this subject in the continuing debate;
- I'm not sure about the format for the day – it leaves me wondering what I have learnt – but maybe that is part of the point?
- the person from DCLG might have been asked to be a bit less bland – maybe she was! She could have offered a slightly more detailed policy agenda;
- the food was excellent!! And everyone very friendly, supportive and interested in networking. So thanks.

# Beyond the radar: Maximising the impact of community activities

Friday 8<sup>th</sup> July 2001  
CLG, Eland House, Bressenden Place, London, SW1E 5DU

## Delegate list

Harriet Ackunson	Department for Communities and Local Government
Sarah Adams	Finance Innovation Lab
Osuolale Adeshina	Centre for Organisational and Professional Ethics (COPE-AFRICA)
Dr Adeyeye Adewole	Centre for Organisational and Professional Ethics (COPE-AFRICA)
Carl Allen	
Rosie Anderson	Community Matters
Kayode Ayomide	Centre for Organisational and Professional Ethics (COPE-AFRICA)
Sulaiman Baul	Southwark Sierra Leone Multicultural Organisation
Chris Blunkell	Faversham Road Residents Association
Katie Bristow	University of Liverpool
Ella Britton	thinkpublic
Steve Coles	Intentionality CIC
Barbara-Ann Collins	Home Office
Eileen Conn	Living Systems Research, + Peckham Residents Network
Lucy Crane	Her Centre
Rebecca Daddow	RSA
Alessio D'Angelo	Middlesex University
Marina David	Barrow Cadbury Trust
Eve Davidson	
James Derounian	University of Gloucestershire
James Devlin	North West Tenants & Residents Assembly
James Dixon	Croydon Neighbourhood Care Association
Amy Downes	Leap Anywhere Ltd
Keith Elder	Mind
Anjelica Finnegan	University of Southampton
Dorothy Ghanker	Her Centre
Baljit Gill	Department for Communities and Local Government
Dawn Hands	BMG Research
Meyrem Hassan	Royal London Society for the Blind
Lee Hazzard	
Tony Herrmann	COGS
Chienting Hung	LSE

## Appendix A

Touray Irene	Youth Care Foundation
Veronika Karailieva	Big Lottery Fund
Arjumand Kazmi	Voice4Change England
Fen Kiple	Community LinCs
Naomi Landau	Third Sector Research Centre
Sara Llewellyn	Barrow Cadbury Trust
Drew Mackie	Independent
Rachel Manning	UWE, Bristol
Alison Masters	
Angus McCabe	Third Sector Research Centre
Jessica McEwen	University of Sheffield
Jacqueline McFarlane-Fraser	ACWDC
Felicity McLean Leap	Anywhere Ltd
Jackie Moore	Community Action Shard End
Paul Munim	WRVS
Hulya Mustafa	Department for Communities and Local Government
Adrian Nettleship	Independent
Dorothy Newton	
Rachel Newton	Urban Forum
Nim Njuguna	NECT
Jessica Nugent	Live UnLtd
Mark Parker	Southwark
Clare Payne	Barrow Cadbury Trust
Robert Peach	Durham University
Roxanne Persaud	Independent
Geraldine Pettersson	Islington Local Involvement Network
Mike Phillips	CDX
Debbie Pippard	Barrow Cadbury Trust
Zoe Portlock	Bikeworks
Alison Redding	Norfolk County Council
Richard Reid	London Fire Brigade
Max Rutherford	Barrow Cadbury Trust
Patience Seebohm	Independent
Haallah Shams	Surrey County Council / Diocese of Guildford
Razia Shariff	Third Sector Research Centre
Kevin Sheridan	IHHD, UEL
Sandie Smith	Cambridgeshire County Council
Andri Soteri-Proctor	Third Sector Research Centre
Saima Tarapdar	
Sandra Turner	TSEN
Lawrence Walker	Locality
Pauline Whitehead	Cranleigh Parish Council
Ed Whyman	Traidmark.org / WEBiversity.org
David Wilcox	Independent
Helen Williamson	AgeUK

# Beyond the radar: maximising the impact of community activities

Friday 8<sup>th</sup> July 2001

CLG, Eland House, Bressenden Place, London, SW1E 5DU

---

## EVENT Write up

**Ice breaker – current socio, economic and political contexts** (*original text*)

### ECONOMICS

Community engagement /development costs, not just short term  
Cuts of shared resources for local communities  
Bonfire of infrastructure organisations  
Crowding out by wealthy  
Consolidation for contracts VCS cant engage as too big  
Accountability of public funds by government  
Resources for BME, marginalised communities

### POLITICAL

Different agenda's of councils, structures that challenge marginalisation are being lost  
Asset transfer – is it realistic ?  
Funding cuts / cuts to contracts with VCS  
Grey areas around meaning of localism, which communities have power ?  
Lack of understanding of community development, cultural difficulties  
Consolidation of contracts – VCS are crowded out  
Government accountability  
Lack of understanding of issues and communities  
Nature of empowerment, individualism VS community

### SOCIAL

Culture change in services/govt/formal sector  
Moving from deficit to celebrate  
Vying for legitimacy, elected or paid PPL  
Understanding activity beyond 'community anchors'  
Transient and highly mobile populations  
Maintaining independence and /or activism  
Power between communities ( empowering the empowered ?)  
Conforming to expectations of 'good' structure/organisation  
Policy blindness to social inequalities, stress on community representatives

### PARKED ISSUES

Big Society risks – meaning everything and nothing  
Big Society / divided society ? marginalisation of e.g. BME  
Way of thinking – crosses three themes: socio, economic and political  
Extent that voluntary sector supports grassroots  
Community development, social change not overnight

## **Appendix B**

Reflections: Power & ?!, difference between the organised world and informal, variations of beliefs, ideology and power

### **Analysing power and influence**

*See Force field analysis table*

### **Asset and Network Mapping**

*See Appendix C*

#### **Key ideas for change**

( in no particular order)

Community feasts  
Co-design and co-delivery  
Community delivery teams  
Use of social media  
Opportunities to prioritise needs and services in times of change  
Volunteer community delivery teams  
Better funding for small groups  
More chances/places to meet  
Map local assets/networks to reinforce/create links  
Focus on local activists and leaders  
Advocacy and campaigning  
Develop a gift economy  
Promote stories of success  
Organise mentoring visits  
Mediate between agencies/communities  
Knowing what's possible and how

#### **Idea cards**

*In addition to those mentioned in the Report:*

Run a BME Housing Association

Problem: Setting up a BME housing association to meet the needs of black young coming out of prison

Solution: The project will enable specialist handling of problems more associated with black issues and proper lasting rehabilitation of these youths into society

Needs: Funding, someone to listen, location and acceptance

#### **Agents of change**

*See full table in main Report*

#### **Ideas Champions**

*See main body of Report*

### btr11 POLITICAL forces *(original text)*

-3	-2	-1	0	+1	+2	+3
<p>Pushes BTR groups to be more resilient x defy empowerment</p> <p>Lack of recognition of the need to recognise the role of small groups / networks, no one size fits all</p> <p>Postcode nature of Big Society</p> <p>Empowerment – lack of grant funding to support very small community groups, lack of support for groups, political polarisation, equality less emphasis on user voice</p> <p>Entrenched culture of directive power at local level</p> <p>Entrenched embedded political power</p> <p>Lack of influence for individuals</p> <p>Asset transfer, possible dangers</p> <p>What is public good, core of decent society. What makes the central decision on key issues that affect people</p>	<p>Commissioning systems, localism not just about local voice, but ability to deliver local solutions and commissioning systems favour 'same old'</p> <p>Changing initiatives, 'pilots'</p> <p>Government accountability of monitoring of big programmes which totally interferes with giving powers to communities to make their own decisions</p> <p>Toeing the party line by elected members</p> <p>All political systems end up in chaos</p> <p>Politics using a particular type of language and acknowledge the roles of community groups and networks</p> <p>Government pushing down power in 'nice' categories, not cutting across issues-working in silo's</p> <p>Timing, readiness of organisations to respond to new rights. Preparing bids, to buy assets, local organisations bidding to provide local services</p>	<p>Minority voices</p> <p>Unequal benefit of devolution to communities</p> <p>Challenge of engaging with longer/consolidated contracts for small voluntary sector organisations with little or no working capital</p> <p>Structure inhibits voluntary sector bidding for contracts</p> <p>Transnational money flow, undermined community activity</p> <p>Policy makers seemingly not listening to sector request to make Big Society Bank about 'soft, patient, impactful' capital (NPC)</p>	<p>Unwillingness to fund process or community level outcomes</p> <p>Localism agenda/ localism bill</p> <p>Democratic deficit. Lack of credibility</p> <p>Conflict between local elected reps and community empowerment</p> <p>Reward, responsibility and accountability</p>	<p>Consumer involvement, pressure for participation.</p> <p>Growth of citizen education, more aware young people</p>	<p>Fear and impact of cuts is restricting the quality / range of work</p> <p>Social media</p>	<p>Activism</p> <p>Asset transfer, and asset management, need for support, if can sustain</p> <p>Individuals can still have influence and make a change if they can still put in the time and effort</p>

## Appendix B

### btr11 ECONOMIC forces *(original text)*

-3	-2	-1	0	+1	+2	+3
Loans ? Obstacles ? Accountability ?  Uncertain funding landscape  High level cuts feed down to individual spending  Networks relying on other resources  Less benefits ( social security)  Danger of over reliance on volunteers  Poverty  Under pressure to deliver  Loss of small grants  Integration  Decrease in donations	Unemployment rises  Lack of time, growth of informal economy  Previously free services now changed e.g. meeting rooms  Working poor, have time poverty  Attracting investment, innovative means in charity desserts  Locality, affluence, time and availability  Human resources	Costs of meeting  Move to commissioning (?)  Need for micro finance (?)	Central host organisation e.g. MIND, PLACE  Groups ?– market – BIG DEBATE  Building space  Philanthropy V market (business plans)  Self help, getting together  Big Society Bank  Care in the Community – here again  Locality, affluence, time, availability	Migration, integration of global BTR + flow of £ between communities  Family businesses growing  Adversity catalyst for BTR  May provide v/m  Focus on: enabling coops and mutual businesses; changed assumptions about organisational life  Olympics: stimulating sports interest; more viable activities  Voluntary sector & support activities  Changing relationships & way of thinking but voluntary sector (time of cuts)	Commissioning individual seminars, individual budgets  Networks unaffected, own funds  Volunteers  Use of personal budgets  Time banks alternative currency  Unemployment rises  DWP community, benefits, involvement	Development of city foundations, local benefactors (?)  Work – life balance  Simplified planning  Motivation to get experience and skills (?)  LOVE

## Appendix B

### btr11 SOCIAL forces (original text)

-3	-2	-1	0	+1	+2	+3
<p>Politicians consistently behind the 'curve' of our social issues</p> <p>In the current economic climate and welfare changes, people in communities do not have the energy or capacity to commit time or more time (x2)</p> <p>Remoteness of top tier authorities from communities</p> <p>Social implications of public sector funding and benefit reductions</p> <p>Language – communications</p> <p>Failure to see the significant difference in nature between community activity and the organised world ( institutions, voluntary sector, business)</p>	<p>Centralised market power</p> <p>Difficulty of developing a local coalition as strengths are often meeting specific needs not generalised</p> <p>Centralised market power</p> <p>Contradiction between government priorities of economic growth (wealth) and 'Big Society' (wellbeing)</p> <p>Cutting funding to parks, children centres, local community groups undermines communities and social wellbeing</p> <p>Intergenerational issues (x2)</p> <p>Support mechanism for mediation being cut: challenging, complex social challenges in some places</p>	<p>Drastic change in relationships between state and citizen. No resources and Market forces</p> <p>Contradiction between communities and active citizens</p> <p>People hijacking issues and not working for the general wider community</p> <p>Stigma's about particular problems such as mental health</p> <p>Usual suspects trying to steer and dominate agenda's</p> <p>Logic of market forces, mutuality's against socially equitable outcomes</p>	<p>Choice may not always be desired</p> <p>Changing relationship between government, local authority, individual.</p> <p>Payment by outcomes may not reflect community needs</p> <p>Where is conflict in this conversation</p> <p>Creation of interest groups</p> <p>Social media becoming an increasingly powerful means of gathering a collective 'voice'</p>	<p>Technology, ubiquitous, and pervasive</p> <p>Changing demographics, older people increasing, ethnic diversity</p> <p>Neighbours showing interest +care to each other</p> <p>Under the radar + other research, helping Tories understand how to achieve our Big Society</p> <p>New roles, new skills, new ways of working and culture</p>	<p>There are many people who are willing and able to support others and provide some leadership</p> <p>The drive of local authorities to engage with small groups ref. Service delivery</p> <p>Innovative ideas</p> <p>Passion</p> <p>Growth of media in social hands: community voices now globally accessible for low cost ?</p>	<p>Personalisation, budgets can be empowering for some !</p> <p>Strong individuals</p> <p>LOVE</p> <p>Faith communities engaged with local area</p> <p>Real power and influence for local people</p> <p>LA's and communities joining forces for mutual benefits based on vocation needs !</p> <p>Growth of a 'new' family. New networks</p> <p>The right of groups not to engage with new ideas/agendas</p>

## Appendix B

-3	-2	-1	0	+1	+2	+3
<p>Social media alternatives, lack of access social exclusion</p> <p>Understanding jargon (x2)</p> <p>Fragmentation of communities (x2)</p> <p>Lack of public spaces (x2)</p>	<p>Localism may provide innovative solutions or may not. And may not be of sufficient scale/reach + how will government know, who will pick up ?</p> <p>Lack of community facilities, increased living and housing costs breaking up families, lack of support</p> <p>Contradictions between collective actions and individualised empowerment/ personalised budgets etc</p> <p>Housing benefit proposed cuts – could mean forcible movement of families from their locality. Changes in tenure, social tenants and private tenants</p> <p>People in crisis don't have time to engage</p> <p>Communities understand place in a different way</p>	<p>Families under pressure</p> <p>Government 'nudge' unit and focus on individual behaviour has some merit but steers the conversation away from systems, processes and social support, and/or responsibilities</p> <p>Issues re people understanding how to access services, which services are appropriate/ relevant etc</p> <p>Single points of access, 'call centres' model. Loss of practitioners in the locality.</p>			<p>Smaller community groups are being organised. More of a profile</p> <p>Family networks – social forces</p>
