- PGA Professional Golf Coach
- Physiotherapist
- Postdoctoral Research Fellow
- Regional Coaching Development Manager
- Trainee Healthcare Scientist
- Golf Coach
- Swimming Instructor

'I began to look at jobs and quickly realised that a Masters degree in an area relevant to the industry I wanted to enter would be very valuable. Therefore the aim of undertaking postgraduate study, for me, was to gain both knowledge and experience and to aid my transition between undergraduate study and beginning a career.'

I am currently working as a Research Associate in the Sport Policy Centre at the university so my course really couldn't have prepared me any more for what I am doing now. The project is about the legacies of sports mega events and therefore in terms of subject area, my course has been of huge benefit. The course also developed more general and transferable skills that are essential in my new role, including analytical skills and independent work.'

HANNAH WOOD, MSc Sport Policy, Business and Management alumna
Hannah is now a Research Associate at the University of Birmingham
