

## Greetings

### Welcome to your EPS Community

Five years ago, the University of Birmingham established a new structure grouping related schools into five colleges: [Arts and Law](#), [Engineering and Physical Sciences](#), [Life and Environmental Sciences](#), [Medical and Dental Sciences](#) and [Social Sciences](#).

As a graduate of [School/Dept](#), you are an alumnus of the College of Engineering and Physical Sciences (EPS) and as such a member of the EPS Community of alumni, students and staff.

Just as the collaborative nature of the college structure means that working relationships between diverse areas of research have been strengthened, we hope that the EPS Community enables you to connect with alumni, students and staff from across the nine schools that are part of the College.

We want to you to be able to make the most of your EPS Community and so you will soon start to receive a quarterly newsletter from the College, as well as more regular information from your School. I do hope that you will find these communications useful and interesting, and would really value your feedback.

In addition, an active LinkedIn network provides a great platform for community growth and so we are pleased to announce the launch of the [EPS Community group](#) on LinkedIn. A sub-group for each School has been created to make the most of the relationships that already exist between alumni, students and their alma mater. To make it easy for you to join, I will be sending you an invitation directly from LinkedIn. If you do not wish to join the group or do not use LinkedIn then please feel free to ignore it. You can also join the main [University of Birmingham Alumni and Friends Group](#) for University news and networking opportunities.

Please do feel free to get in touch with me, particularly if you would like to organise a class reunion, re-connect with your School, let us know what you are up to now or want to get more involved in the success of our current students.

With best wishes,

**Kathryn Chedgoy**

*Alumni Relations Manager, College of Engineering and Physical Sciences*
