8. Q Where can I find a list of countries that are considered to be Low to Middle income countries (LMIC)?
A The Development Assistance Committee (DAC) list of Official Development Assistance (ODA) eligible countries can be found here; all LMIC countries that appear on this list are considered to be ODA eligible. The list of LMIC countries is subject to updates by the OECD.

9. Q Do applications have to have an LMIC partner?
A No, we will accept and consider applications without an LMIC partner. However, as there is an Overseas Development Assistance (ODA) requirement on our funding, the proposed research needs to be primarily of direct benefit to LMICs. Preference will also be given to applications that are LMIC-led and/or have LMIC partners involved.

10. Q Do applicants and co-applicants have to be based at different institutions?
A Yes, at least one of the co-applicants must be based at a different institution. Applications where all applicants are based at the same institution will not be accepted.

11. Q How can I find more details about potential collaborators?
A Our Members’ Directory is a tool where members of the Network can login and access further details about other members and thus identify potential collaborators.

12. Q Do I need to have all the research governance requirements for the project already in place (e.g. collaboration agreements, intellectual property (IP) considerations, animal licences, etc.)?
A The expectation is that any required research governance is in place by this time so that the start of the project is not delayed.

13. Q Does the BactiVac scope include the development of bacterial vaccines to veterinary as well as human pathogens?
A Yes, the scope of the Network includes the development of vaccines against bacterial diseases in both humans and animals. BactiVac is also interested in funding projects that address the emergence and spread of AMR in both humans and animals that poses a significant threat to human health through the development of vaccines against these antibiotic resistant pathogens.

14. Q Is the inclusion of investigator/applicant supervision time/costs allowable?
A No, investigator/applicant project supervision costs are not supported and should not be included in the budget requested. We will consider funding applicant salary costs where their time is committed to directly delivering the research and a justification for this would have to be included within the application.
No. Question (Q) / Answer (A)

15. Q How much information is required in Section 17 regarding the 20% matched funding for UK institutions?
A The information needs to show that the UK host institution is aware of the need to meet the remaining 20% of the fEC funding so that the direct costs required to deliver the project are provided to the lead applicant. This only applies to UK higher education institutions who are costing their requests for funding on an fEC basis.

16. Q How do I record supervision time in Section 17?
A Supervision time for lead applicants and each co-applicant cannot be costed into the budget, but this should be recorded in Section 16 as the number of hours per week spent supervising the project and an indication of the corresponding financial value of the time allocated for supervision purposes.

17. Q Must the budget be broken down equally between all applicants in the proposal?
A No, however proposal budgets should ensure that all partners are adequately resourced to deliver their respective contributions to the research project. Applicants should also ensure that they provide details in the application form of any matched funding or in-kind contributions provided in support of the project from other sources as this is key information that the Network needs to track and report on.

18. Q Do I need to complete the Due Diligence Questionnaire?
A Yes, this is a mandatory part of the application process and is a requirement for funding. Your application cannot be accepted without this supporting document, and funding cannot be awarded without the appropriate due diligence approval from University of Birmingham.

19. Q Will I be notified if my application is deemed ineligible?
A Applications submitted by the submission deadline will undergo a screening process to ensure compliance with the eligibility criteria and that all the required supporting documents requested have been provided. An email acknowledging receipt of your application will be sent by the BactiVac Admin Team to the email address provided within 2 working days of receipt.

20. Q Will I receive feedback on my proposal?
A All eligible applications submitted by the deadline will be put forward for peer review. If your application is unsuccessful, anonymised feedback can be provided, upon request, to support you in improving your application in future rounds of catalyst funding.
