

## Pregnancy ANtihypertensive Drugs: Which Agent is best?

@GiantPANDATrial

**84** women were randomised in March which is our best month ever—well done! This means in total **947** women have now been randomised, so we are VERY close to hitting **1000** out of our 2300 target!

Thank you EVERYONE for your hard work and commitment, Please keep screening and randomising women so that we can keep the momentum going. Can you do it again in April?

Epsom & St Helier, Northumbria, Southport & Ormskirk, Wye Valley and University Hospital Bristol. We look forward to working with you!

*Chelsea & Westminster, Royal Preston and St George's recruited ONE MORE than their previous 3 month average!*

*Chesterfield, Mid Yorkshire, Northumbria, Nottingham, and Salisbury all HIT their targets in March!*

*Guys and St Thomas', Homerton, Kingston, Manchester, Poole, South Tees, Southmead, United Bath and Warwickshire all EXCEEDED their targets in March!*

*An edible surprise will be coming your way for these achievements!*

The next teleconference is on 26th April at 1pm—please join us!

Some sites told us that:

- \* they would like to know more about how to approach women already on antihypertensive medication;
- \* they sometimes need to provide additional information to enable GPs to provide repeat prescriptions of antihypertensive medication (and make it clear that it is part of usual clinical care, without needing a special trial prescription).

...to help address these issues, we have developed the two study resources attached.

We have also updated the Giant PANDA patient facing poster with your feedback – this is due to be submitted as an amendment to ethics.

Keep telling us your feedback so that we can make recruiting easier and smoother.

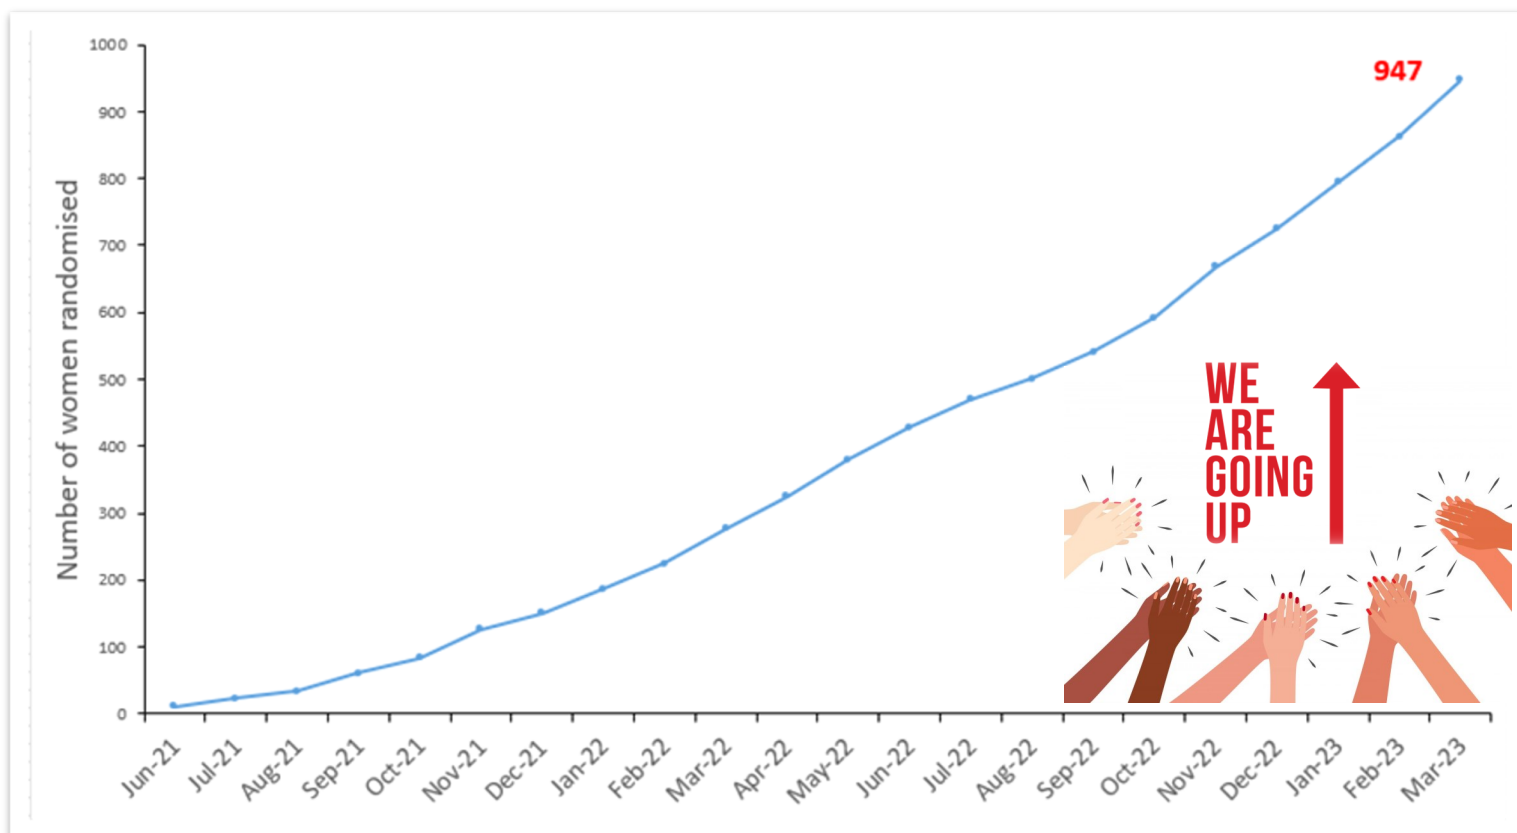

We received a wonderful e-mail from our newest team at University Hospital Bristol who have been on a Giant PANDA promotional ward round—we are loving the initiative and enthusiasm!

# Recruitment over time

## Well done Giant PANDA sites!

During February/March 2023, over 1000 queries were raised in anticipation of our TSC and DMC meetings. In just 4 weeks, you have smashed this out of the park and got the number down to just 35 remaining queries. Please give yourselves all a metaphorical pat-on-the-back! (Or a literal one if you fancy it.)

Please find below a list of the most commonly occurring queries and how to avoid these moving forwards:

- ◇ Missing Forms/Sections/Fields— the most common query that covered over 75% of all queries raised, was that of missing forms, sections or fields within the database. Please ensure that every single field on a form is completed and should any data not have been captured, please let us know within the query bubble for that specific field.
- ◇ Missing blood pressure readings— if a blood pressure reading was not taken on either the antenatal inpatient or outpatient forms, please ensure that you tick the relevant box to say that it was not taken as to avoid a query being raised.
- ◇ Diagnosis of pre-eclampsia— on the Maternal Outcomes form, within both the “before birth” and “after birth” sections, there is the question: “Did the woman have a diagnosis of pre-eclampsia or superimposed pre-eclampsia after birth (up to discharge or 28 days post birth)?”. If the woman had a diagnosis of pre-eclampsia when she enrolled, please always select “NA (enrolled with pre-eclampsia)” for this question.

## Shout Outs!

**Kate Duhig**

**Manchester University NHS Foundation Trust**

**We would like to give our April Shout Out to Kate Duhig at Manchester for her continued exceptional hard work on the Giant PANDA trial. On the 17th March, Kate was able to recruit and consent a woman during a night-shift!**

**Would you like to nominate anyone for a May shout out? Please email [a.evans.10@bham.ac.uk](mailto:a.evans.10@bham.ac.uk) with details of whom you would like to nominate and why!**

**Professor Lucy Chappell, Chief Investigator**

**Professor Jenny Myers, Co-Chief Investigator**

**Lisa Leighton, Senior Trial Manager (BCTU)**
