Balance tests

Note: Perform the balance tests at the designated location in the room and standardize in every room. Let the patient choose a preferred foot for the semi-tandem and tandem stand. After this the patient cannot switch so the preferred foot stays the same. **Give the following instruction: "stand as still as possible with the arms along the body".** Try a maximum of 3 trials if the patient is not able to maintain for 10 seconds.

International Physical Activity Questionnaire Short Form (IPAQ, Both, M. L et al., 1999)

We are interested in finding out about the kinds of physical activities that people do as part of their everyday lives. The questions will ask you about the time you spent being physically active in the <u>last</u> <u>7 days</u>. Please answer each question even if you do not consider yourself to be an active person. Please think about the activities you do at work, as part of your house and yard work, to get from place to place, and in your spare time for recreation, exercise or sport.

Think about all the **vigorous** activities that you did in the **last 7 days**. **Vigorous** physical activities refer to activities that take hard physical effort and make you breathe much harder than normal. Think *only* about those physical activities that you did for at least 10 minutes at a time.

1.	_	he last 7 days, on how many days did you do vigorous physical activities like heavy ligging, aerobics, or fast bicycling?

Short Fall Efficacy Scale International (FES-I, Kempen, G. I et al., 2008)

Now we would like to ask some questions about how concerned you are about the possibility of falling. Please reply thinking about how you usually do the activity. If you currently do not do the activity, please answer to show whether you think you would be concerned about falling IF you did the activity. For each of the following activities, please tick the box which is closest to your own opinion to show how concerned you are that you might fall IF you did this activity.

Food Frequency Questionnaire (EPIC, 1997)

This questionnaire asks for some background information about you, especially about what you eat.

Please answer every question. If you are uncertain about how to answer a question then do the best you can, but please do not leave a question blank.

YOUR DIET LAST YEAR

For each food there is an amount shown, either a "medium serving" or a common household unit such as a slice or teaspoon. Please put a tick (/) in the box to indicate how often, on average, you have eaten the specified amount of each food during the past year.

EXAMPLES

For white bread the amount is one slice, so if you ate 4 or 5 slices a day, you should put a tick in the column headed "4-5 per day".

FOODS AND AMOUNTS	AVERAGE U	SE LAST Y	EAR						
BREAD AND SAVOURY BISCUITS	Never or	1-3 per	Once	2-4	5-6	Once	2-3	4-5	6+per
(one slice or biscuit)	less than	month	a	per	per	a day	per	per	day
	once/month		week	week	week		day	day	
White bread and rolls								1	

For chips, the amount is a "medium serving", so if you had a helping of chips twice a week you should put a tick in the column headed "2-4 per week".

FOODS AND AMOUNTS	AVERAGE U	VERAGE USE LAST YEAR								
POTATOES, RICE AND PASTA	Never or	1-3 per	Once	2-4	5-6	Once	2-3	4-5	6+per	
(medium serving)	less than	month	а	per	per	a day	per	per	day	
	once/month		week	week	week		day	day		
Chips				✓						

For very seasonal fruit such as strawberries and raspberries you should estimate your average use when the fruits are in season, so if you ate strawberries or raspberries about once a week when they were in season you should put a tick in the column headed "once a week".

FOODS AND AMOUNTS	AVERAGE U	/ERAGE USE LAST YEAR

Strawberries, raspberries, kiwi fruit			1						

Please estimate your average food use as best you can, and please answer every question - do not leave ANY lines blank.
